

CIMTECH Consulting

Our team has gained recognition in Asia, the ANZAC, and the Middle East market as a successful technology business solutions practitioner, managed services partner, and technology enabler in the domains of banking, technology, asset management, retail, and real estate sectors.

We have been present in various regions for decades, guided by independence, focus, and innovation principles. Additionally, we are the newest member of a diverse group of companies operating in the financial services, manufacturing, and consumer services industries, and we consistently earn accolades for our services.

Our Technology and Transformation product suite is designed to drive innovation, enhance productivity, and significantly improve profitability thus fostering a "Business Driven" business model.

VISION

To be an agile and client-obsessed managed service provider that empowers growing businesses with tailored and reliable technology solutions.

MISSION

To partner with businesses, delivering comprehensive Technology Business Solutions via expert managed services that enhance efficiency and allow them to focus on their core competencies.
