A-38624SH-12	3/4"	31	2.500	1.32 +/- .005

A-38624SH-20	1 1/4"	49	1.500	1.99 +/- .005

NOTE: The Metric Micro-Crimp Adjuster on A&I Products crimpers is a direct reading micrometer. Add the setting on the micrometer to the closed diameter of the die set to obtain the finished crimp diameter. For example: With a 39mm die and the adjuster set at 3, the finished crimp diameter would be 42mm.

* This is a suggested crimp diameter, please use this as a guide line only. Machining tolerances on crimp dies and crimper wear do and will effect actual crimper settings.
