## CABLING

# CONNECTOR TYPES

**Terminology:** Plugs have pins, Sockets have holes  
Males have things sticking out, Females....do not

### Mains/Lighting connectors

5A Round 3 pin connector used for lighting. Not very common.

15A Round 3 pin connector used for lighting. Often found in Theatres.

13A Square 3 pin connector. Found in your house.

16A Ceeform Round 3 pin single phase connector blue

32A Ceeform Round 3 pin single phase connector blue

63A Ceeform Round 3 pin single phase connector blue

125A Ceeform Round 3 pin single phase connector blue

16A Ceeform Round 5 pin three phase connector red

32A Ceeform Round 5 pin three phase connector red

63A Ceeform Round 5 pin three phase connector red

125A Ceeform Round 5 pin three phase connector red

Socapex Round 18 pin connector used primarily for lighting – 6 circuits

IEC Female 10A in line connector. Commonly known as a Kettle plug

IEC Male 10A in line connector

Bulgin 8 pin Female in line connector. Commonly used for 4 channel disco lighting

Bulgin 8 pin Male in line connector

ELV 8 pin male connector. Commonly used for NJD lighting products.

5A Bulgin 3 pin connector. Commonly used for Pyrotechnic control systems.

### Audio connectors

6.3mm mono jack plug. Has one black band on jack

6.3mm stereo jack plug. Has two black bands on jack

3.5mm mono jack plug. Has one black band on jack

3.5mm stereo jack plug. Has two black bands on jack. Commonly used to connect to your phone, Ipad or Laptop. Often called a mini-jack

### CABLING

## CONNECTOR TYPES

### Audio connectors

RCA Phono plug – Commonly used as an interconnect between mixers, amplifiers, CD players and other playback devices. Terminals often coloured Red & White/Black. Used as a video connector on domestic equipment with a Yellow marking

Female XLR 3 pin – Commonly used as an output connector from a mixer or for connecting to a microphone. Can be used for lighting DMX connection as well

Male XLR 3 pin – Commonly used as an input connector to an amplifier or for connecting a microphone to a mixer. Can be used for lighting DMX connection as well

Male/Female 5 pin DIN connector. Primarily used in the 70/80s for connection of cassette machines to amplifiers. Also used for remote controls on smoke machines.

Male/Female XLR 4 pin – Commonly used as a remote control connector for Snow machines and headsets for ring intercom systems

Male/Female XLR 5 pin – Commonly used as a DMX connector for lighting control systems

Male/Female 2 pin din connector. One flat pin and one round pin. Not commonly used today but widely used in 70/80s as a hi-fi loudspeaker connector.

Speakon professional loudspeaker connector. Available as 2 way for standard systems, 4 way for bi-amp systems and 8 way for professional active systems. No female connector available – use a coupler to join two together

Speakon coupler for joining two Speakon connectors together

Phono coupler – For connecting two phono plugs together

3.5mm jack plug with 3 black bands on jack. Used in AV applications to carry video and left/right audio signals. Usually used with video camcorders.

VGA 15 pin connector found on computers and video projectors for connecting analogue display signals

HDMI connector found on TVs and video projectors for carrying high definition digital video and audio signals

SCART connector found on VCRs, TVs & DVD players. Carries analogue video and left/right audio signals for playback and recording

## HELP & ADVICE

If you are unsure of your requirements or require any further information please call us for helpful technical advice

## COLLECTING/RETURNING EQUIPMENT

Equipment is collected and returned by you the customer from our premises. We will gladly supply assistance in loading and unloading vehicles if personnel are not dealing with other customers. A loading bay is situated on the road outside our premises in Campbell Road for customer collections and returns.

## DELIVERY/COLLECTION

We can deliver, set up, pack up and collect equipment if required. Please supply us with latest time of delivery, venue address with postcode, whether you require just drop off or set up for a quotation. All hire and delivery/collection fees must be paid at least 48 hours in advance of booking date.

## HOLDING DEPOSITS

There is a minimum £100.00 holding deposit payable by debit/credit card only on all equipment hires. We request this payment at time of booking. No payment, no reservation. Holding deposits are only refunded when ALL equipment (including spare parts, leads, spare lamps etc) are returned and have been checked. Holding deposits can be refunded if the cardholder is not present.

## HIRE FEES

Hire fees are payable prior to or upon collection of equipment unless you are already a pre-approved account holder. Please ask for an account application form should you require credit facilities. This must be done 2 weeks prior to any hire agreements to allow time for credit checking and setting up your account. Minimum £75+VAT per month spend to qualify for account facilities.

## CANCELLATION POLICY

When you reserve equipment by paying your holding deposit we may have to advise other customers that equipment is unavailable as we have it reserved for you. If you should then cancel your reservation we may lose business. Therefore hire fees are due under the following circumstances:

Cancellation 48 Hours or less notice	Full payment
Cancellation 7 – 3 days notice	50% of hire fee
Cancellation 14 - 8 days notice	25% of hire fee

Full Legal Terms and Conditions for hire and sales are available upon request. Please note equipment is NOT insured under any circumstances. BAV reserve the right to refuse hire facilities without reason

### BOOKING/RESERVING EQUIPMENT

To reserve equipment for a specific date please call in to our showrooms or telephone us with your card details. A minimum £100.00 holding deposit is payable at time of booking. BAV do not accept cash as a means of payment for the holding deposit. If you do not possess a debit/credit card we cannot supply you with hire equipment. Hire fees are paid prior to or upon collection of equipment. Holding deposits will be refunded upon return of **all** equipment.

### EQUIPMENT

Please note that BAV electrically test all of our equipment by a PAT – Portable Appliance Test at regular intervals. You will find a green Tested sticker on every single item of our equipment showing its last PAT Tested date and its own unique serial number. Equipment is always connected and tested prior to hire. You will always hear loudspeakers working before you take them away. If you are using equipment in a venue which requires proof of electrical testing please ask for a PAT certificate in advance.

In the unlikely event of equipment failure at your event please call our emergency out of office hours mobile no 07887 508157 where we will assist you with advice or come out to your venue with replacement equipment. Please note that false alarms leading to a call out will be chargeable so please check the equipment is actually faulty and not operator error.

BAV will always supply equipment with spare lamps and/or fuses where applicable. With today's technology we often find most faults are either cable related or mechanical. It is very rare for electronics to fail. Therefore please treat cables with respect – do not coil them over your arm and just because an item of equipment is supplied in a flightcase it is not an excuse to throw it about!

Please return all cables coiled and taped. Cables and/or equipment returned covered in glitter, confetti, mud, grass, lipstick or dog hairs will require cleaning for which there will be a cleaning charge. Please return equipment in the same manner in which you receive it.

### MANUALS & INSTRUCTIONS

Instructions will be provided at the time of equipment collection on how to connect the equipment together. Although for some items of equipment we will provide instruction manuals if you are a technophobe bring somebody with you who has a basic understanding of equipment. We cannot be responsible or issue refunds for equipment mis-use or operator error.

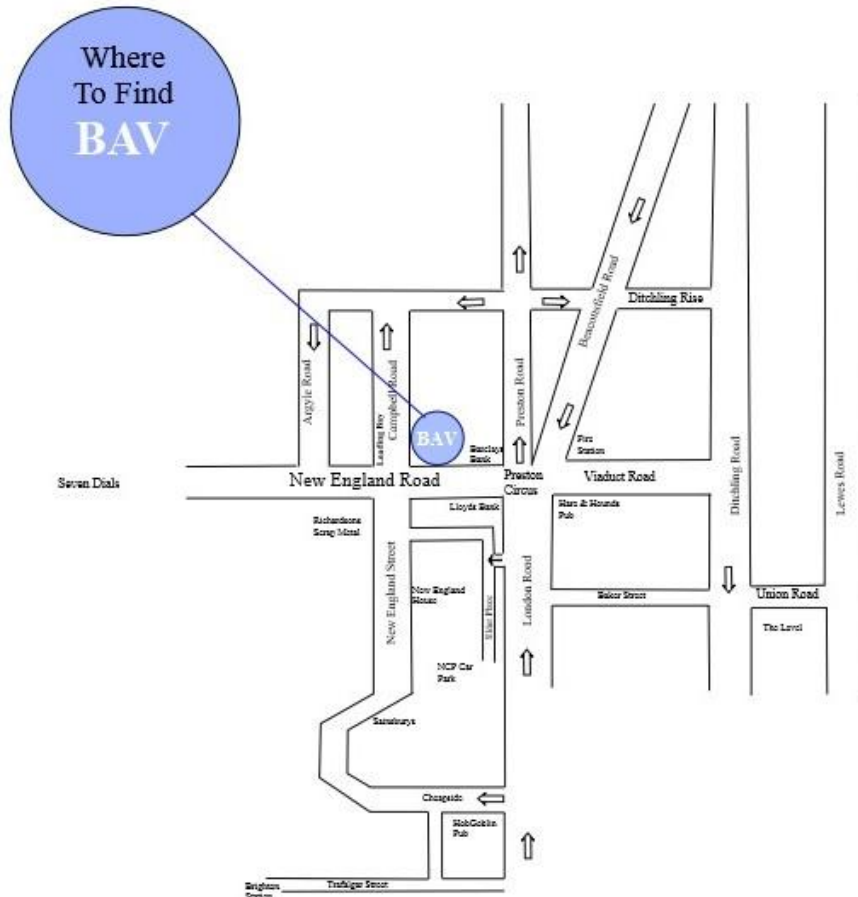

### OUR AIMS & MISSION STATEMENT

Despite all of the above Do's and Don'ts we do wish you to have an enjoyable and satisfying experience whilst dealing with us. We aim to provide a professional service supplying reliable and high quality equipment with helpful and professional service and advice.

In the event that you are not satisfied please tell us and suggest how we can improve our service.
