All current laws of earth-based physics will be repealed and a new set of **Law** governing the spiritual ascension of humanity will be brought forth to govern human progression along the natural

Continuum of Consciousness toward a pure state of

Being. The Law which will define a new *Natural Science of Being* and the methodology for achieving this perfected state of humanity is outlined in this brief archive. The *Physics of Spirit* documents the natural universal

Law governing the evolution of humanity through the progression of *Thought* from brain to mind to Divinity.

$$\varepsilon \rightarrow \Pi \rightarrow \infty$$

All laws collapse into the primary **Law** of the *Physics of Spirit* which states simply that all that is arises from **Divine Force of Thought**.

Thought is All and All is Thought

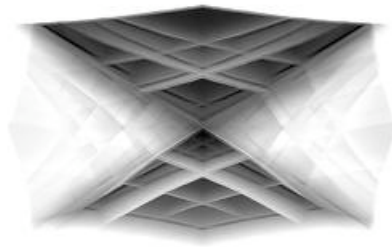

Physics of Spirit

Creation follows *Thought* through its natural entropic progression into the universal theater of *Life*. The *Physics of Life* (FIRST ARCHIVE) chronicled the mathematics of this natural progression.

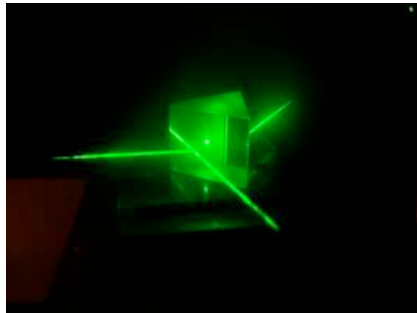

In summary, *Thought* created manifestation via the *photonic bridges* and the Genesis path of *Life* on Earth began. The prerequisite to this

Path of Life was the creation of space-time as the matrix upon which physical manifestation was built.

Pure *Sound* was transduced along the *photonic bridges* into *Light*.

*At first there was the Word and the
Word said "Let there be Light."*

Pure *Thought* exists in a state of primary and pure *Sound* beyond *Light*, far beyond space-time. In this state-less State, *Thought* is Unbound and free, having no limitations and infinite potential.

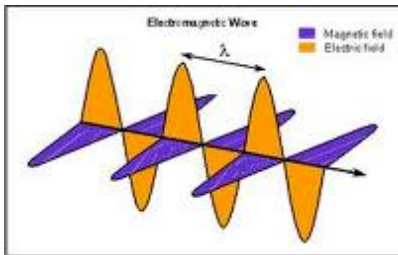

Passage of the *Force of Thought* through the *photonic bridges* allowed manifestation of atomic based matter.

Physics of Spirit

From the creation of the electron arose *electromagnetic phenomena* as one of the four primary universal forces of the physical universe.

Along the path of physical evolution thus started, human *Life* arose on Earth.

In this manifest form, *Thought* became **apparently** bound into the limitations of the physical brain as chemical and electromagnetic processes.

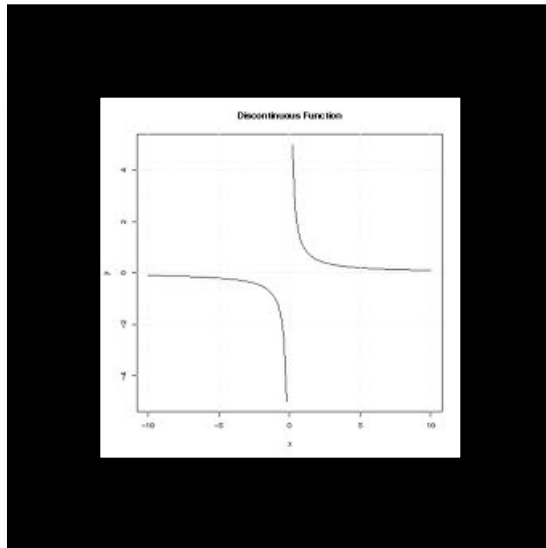

Yet, access to *Thought* in its pure Unbound state was never lost. Early *Life* on Earth carried the thread of memory allowing will-ful return through the *photonic bridges* to the primary state of *Being* in which *Thought* is Unbound.

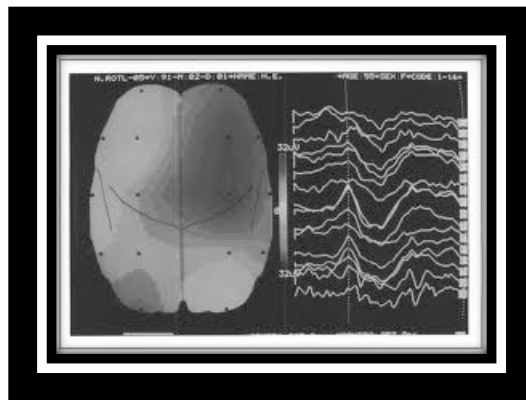

At a critical nexus in human evolution, a cataclysm occurred which has been long forgotten in Earth history. The thread of memory was severed and a turning point in human evolution was reached. Humanity took a wrong turn at the crossroad and the path back to Unbound Thought was forgotten. A *gap* occurred in

the *Continuum of Consciousness* that halted the natural progression of human consciousness.

Through the ages, human thought became further bound into the limited arena of the physical brain and its chemical and electromagnetic function.

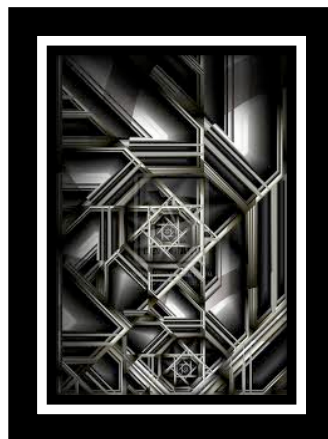

The natural connection between heart and brain was lost.

Fear ruled over Love. Humans became separated from the Earth, each other, and their own true nature. Violence, environmental destruction, economic collapse, poverty, unhappiness and increasing encroachment on individual freedom have resulted from this wrong turn.

Physics of Spirit

Now, Earth has reached another critical point in its history. Passage through this upcoming nexus requires bridging the gap along the *Continuum of*

Consciousness and catalysis of an accelerated process of consciousness

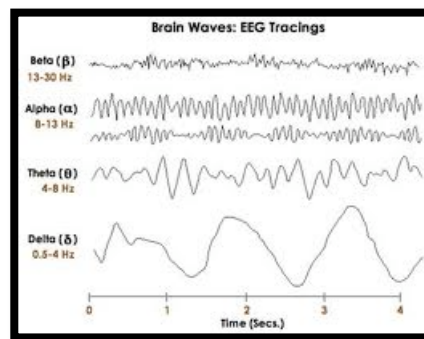

progression along the bridged *Continuum*.

An entirely new science is required to define this progression and is termed **Kairal Nebula Science**, a **Kairal Science of the Brain** which returns humanity to the original *Science*, the *Natural Science of Being*.

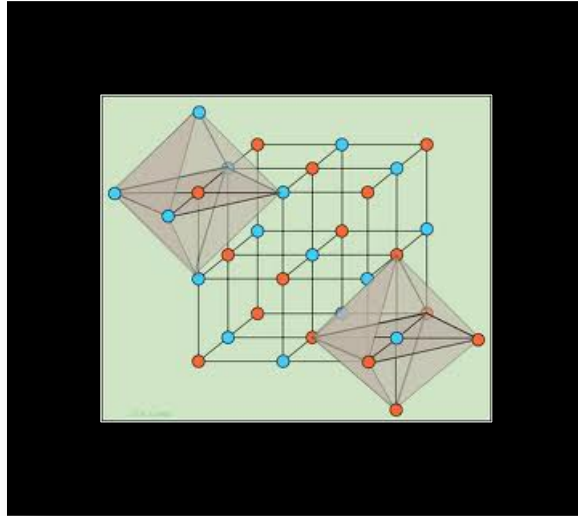

The **NINE STEPS** are clear and involve accelerated progression along the **Kairos Kontinuum (KK)**. The physical brain must first be activated to higher electromagnetic realms which in the current context of space-time involve acceleration of the electroencephalographic pattern through higher frequency zones above what can currently be measured.

EEL (expanded frequency electroencephalography lite) allows expanded measurement of time-based brain electromagnetic phenomena along the **Kairos Kontinuum** in frequency domains from **1000 Hz to infinity (STEP 1)**.

The accelerating expansion process involves a Kairal salt-resonator upgrade to **EEL** (**EEL-S**) allowing Kairos-based feedback in the frequency domains from **1000 Hz to infinity** (STEP 2).

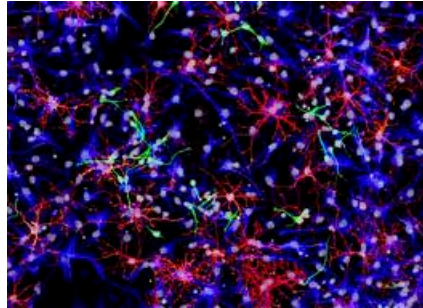

At ***infinite frequency***, wavelength collapses to **zero** allowing passage of the brain beyond spatial limitations.

$$\lambda \rightarrow 0 \text{ as } \nu \rightarrow \infty$$

Physics of Spirit

The star burst pattern created by this higher frequency Kairos activation allows the brain to progress from electromagnetism to light-based glial syncytial processes.

The *Nebula Pattern* created allows *Thought* processes to occur at light speed (above the level of neural based electromagnetics).

Field potentials open to *Light Potential*. The brain must be allowed to progress at increasing acceleration along the Kairos Continuum, now using Light-based principles beyond simple electromagnetic signaling (STEPS 3-8).

StarFish combines EEL-*S* with Kairos-9 Tachyon Feedback processes

linking *Light, Sound* and **CARDIO-CORTICAL SYNCHRONIZATION** with
the individual heart beat through a *Thought resonant process* between a quartz-
based liquid crystalline photonic screen and the *pineal gland* (Q-
TASR, *quartz-based Thought Amplification via*
Stimulated Resonance).

Mathematics embedded subliminally within the *Sound of*

Water acts as a catalytic key (*aqua-tone key*), activating **only** human

DNA in which the appropriate musical code is embedded. The resulting enhanced

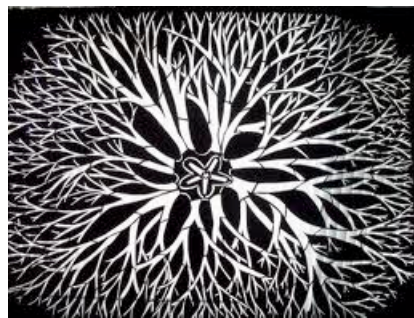

Nebula functioning of the Glial Syncytium (**Neu-bula state**)

catalyzes a second *star burst pattern*, an **octave higher for the turn**,

carrying the brain across the *photonic bridges* from *Light*-based function to

supra-light (**TACHYON FIELD**) function (the **NINTH STEP**).

*The **Kairos Kodex** is opened.*

Thought becomes Unbound and full access to the **Library of Knowledge** is achieved.

The **NINE STEPS** (*MAPS*) allow progression of *Thought* from field potential to *Light* potential to Unbound limit-less Potential. Thus, humans achieve their natural state of *Being*, Unbound Thought without limits.

Before embarking on this *9-fold journey*, each individual must ask:

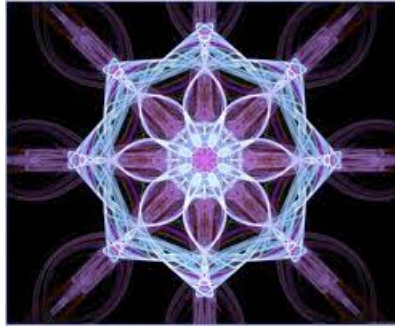

“If I were given the key to understanding everything in the Universe, what would I do?”

The **Kairos Kodex** is the **Bridge** to *infinite knowledge*, infinite creativity, infinite potential and holds the **Key** to the manipulation of physical matter.

It is the *MAP* to the individual's deepest and truest self, it is the *MAP*

HOME...

**Nothing more need be said
regarding the Physics of Spirit
for those with eyes to see and
ears to hear shall follow the
Nine-fold path to pass through
the Gates of Heaven and enter
Divinity...**

May peace and joy be with you on this continuing journey.
