Camps, care, and enrichment programs designed to educate, entertain, and engage students.

CLASS DESCRIPTION

SPANISH

INTERNATIONAL SCHOOL OF LANGUAGES

ISL provides a well-rounded online language program for those children in grades K-2 that are either starting to learn a foreign language or would like to continue adding to their knowledge. Apart from the language, children will learn some culture, and traditions where the language is spoken. During this online program, students will be introduced to different topics according to the age and level of the students. Topics rotate each session; therefore, students who register for later sessions will learn something different each time. Class sizes are small and taught by native speakers who are experienced teachers of the language and culture, engaging, fun and motivating. Instructors use every moment as an opportunity to motivate students to use and practice their speaking skills. During each program we introduce a series of games and activities that develop the skills needed to learn a second language in a consistent and sequential manner.

POTTERY FOR KIDS - SPRING MUDSKIPPERS

Join Mudskippers Pottery and fling into Spring! Come get your hands dirty as we explore the world of pottery with stoneware clay, fired bisqueware and modeling clay. Each session our students explore new projects and artworks. Come on and see how much fun it is to get muddy!

SCIENCE THROUGH ART ISTEAM

Our young scientists will get to create art, experiment with creativity and outside of the box thinking while learning about science. Scientific concepts are introduced through hands-on projects like modeling the water cycle with colorful rainclouds, reactions with starch and acid making invisible ink, and exploring ocean density. Our young scientists are encouraged to ask questions, think critically, experiment, and explain their reasoning and problem-solving. As a result, they will deepen their collaboration, creativity, and critical thinking skills, as well as their understanding and interest in science.

CARTOONING WITH YOUNG REMBRANDTS

ART BOX

Make this spring a memorable one for your child. Students enrolled in a Young Rembrandts Cartoon Class will learn the essential skills they need to illustrate exciting cartoon imagery that is filled with dynamic characters and expressive personalities. Our students will create fully realized cartoon characters from fun subjects like robots, hilarious dogs, and funny insects. Drawings of comical cars will spark our students' imaginations. They will also develop their visual story telling skills as they draw sequential images. All this and more await our students. Enroll your student today!

CHESS CLUB

SILVER KNIGHTS ENRICHMENT LLC

Learn chess with Silver Knights! We've taught 100,000 children to play including state & national champions, but most students are beginners looking to learn a new skill and have FUN. Class time is divided between lessons and practice games. Lessons range from the basic rules to advanced tournament strategies. Students will have the opportunity to play in tournaments. All chess supplies provided. All skill levels are welcome.

HIGH FIVES RUNNING CLUB

OVERTIME ATHLETICS

Kids are natural runners, but spend a lot of time hearing "No Running!" How many times does a child hear this? No running in the halls... No running in the house... No running at the pool... It goes on and on. The HIGH FIVES RUNNING CLUB puts a stop to the "No Running" and let's the kids fly! Crawl, Stand, Walk, Jog, Run... Gradually developing the habit to run can change and impact ones life forever. This program will bring a shot of energy with the daily warm-up game, then blast off with the daily workout. Our goal for the HIGH FIVES RUNNING CLUB is to get heart rates raised and to increase endurance.

LEGO STRUCTURES: JR STRUCTURAL ENGINEERING

STARBRIGHT ENRICHMENTS

Become a junior builder and make amazing LEGO creations! You will learn core structural engineering concepts while building cool creations like towers and castles. There are no instruction booklets in this class – you will use your imagination to build these structures while learning the engineering behind them. So while your buildings will look cool on the outside, they will be rock-solid on the inside, ready to withstand an onslaught from earthquakes, boulders, and even hurricanes.
