

Tattoo Agreement

1. Scheduling:

Before scheduling with me make sure you understand that I am a learning artist and I am not working under any official tattoo establishment. My experience level or style may be different from that of your desired design. All inquiries about designs should be discussed before. Payment and deposit should be discussed within the scheduling process. If I have not given you a price contact me.

2. Your Safety:

There are a couple things I do to ensure your safety throughout the tattoo process. The space of the tattoo will be fully cleaned, disinfected, and organized. I will be using a brand new, sterile, prepacked cartridge needle for each tattoo. Each needle will be disposed of safely after proper use. I have completed the Bloodborne Pathogens Infectious Disease Control Best Practices / Precautions basic course training to ensure I am educated on your safety.

For your safety please mark either box:

Do you currently have any conditions that would interfere or be aggravated by getting a tattoo?

Yes ☐ no ☐

Are you 18 or older?

Yes ☐ no ☐

Do you have any allergies?

Yes ☐ no ☐

Please list if yes: _____

3. Tattoo process:

I will clean the area with a disinfecting wipe to prevent infections. Throughout the tattoo I will keep a clean station and will be respectful of your space as well. If at any time you need a break, it is your responsibility to tell me. If the tattoo cannot be completed within the appointment period, the client should understand that payment should still be as discussed and arrangements will be made on a per situation basis to complete the tattoo.

4. Design Details:

If provided a design, all permissions to that design will be given by the client. I provide original designs at the clients request. A design provided by me is only intended for the tattoo only unless specific permission has been expressed otherwise.

5. AFTERCARE:

For the best, healed, results of the tattoo I will apply a second skin protective layer (Saniderm) on the area unless it is unwanted by the client. I suggest that it be left on for at least a week if at all possible. Remove the Saniderm while in the shower for the most painless removal and gently clean with an unscented antibacterial soap (Dial). Keep it moisturized and clean it as often as you can.

Client contact information:
