

Heat Tolerant Fuchsias

While most fuchsias like cool conditions, there are some that are tolerant of heat to various degrees. This list is a compilation of heat tolerant lists from California, warmer areas of Oregon and growers in the PNW who notice that when the greenhouse really heats up, some plants seem to be not affected. In general, fuchsias with long tubes and short sepals have parents from the warm areas, and those wee F. x encliandras can take heat although they may stop blooming.

TRAILING VARIETIES

Amber Rose	Miss California
Amy Marie	Multa
Angel's Flight	Orange Drops
Applause	Peppermint Stick
Autumnale	Pinch Me
Baby Chang	Pink Galore
Barbara	Pink Panther
Bicentennial	Postiljon
