

Julia's Star Foundation

Hello my shining stars,

COVID-19 is a threat to both the elderly and to the immuno compromised population. Part of the immune compromised population are children going through aggressive cancer treatments such as chemotherapy and radiation.

Even though we have had to cancel some of our annual events, our foundation NEVER stops working to help support these children and their families. Even during these challenging and uncertain times, these families must break quarantine for hospital visits and treatments.

We've been fortunate to receive a donation of face masks from Kai Makela (designns.com). We are distributing them to St. Mary's Medical Center and Nicklaus Children's Hospital.

With your support, we were also able provide Palm Beach Children's Hospital staff with breakfast from Bagel Works on Wednesday, 4/8.

With that said, there's still plenty of work for us to do to support these children and their families.

- Frequently and thoroughly wash your hands for at least 20 to 30 seconds.
- Practice social distancing.
- Shopping on Amazon? Use smile.amazon.com, select Julia's Star Foundation, and 0.5 percent of your purchase will be donated our foundation.
- If possible, [DONATE!](#) Our work to support these children NEVER stops.

On behalf of the entire JSF organization, please stay positive and safe.

Alexandra Passos

Founder of Julia's Star Foundation
