ENVIRONMENTAL TRAINING QUIZ (Texas Industrial Operators)

Note – This “refresher” quiz is most appropriate for employees that already have training in the most common environmental regulations that apply in Texas.

YOUR NAME: (print clearly)	
YOUR COMPANY:	
DATE:	

1. Complete this optional “open book” quiz in neat handwriting (must be legible!).
2. Scan and send back to the email in the upper right corner.
3. STEELE will email you a **certificate for 1 hour of environmental training**, free of charge (and will supply you with an answer key so you can check your answers).

SCENARIO 1: Single-walled above-ground fuel storage tank containing diesel.

Which state and/or federal regulations govern the construction and operation of this tank?

What is not in compliance with the regulations here?

SCENARIO 2: Scrap metal roll-off on an industrial property.

Which state and/or federal regulations govern the operation of this device?

What is not in compliance with the regulations? (Hint – there are at least 2 things)

SCENARIO 3: Painting industrial metal parts.

What kind of permit is required to do this work, and from which Texas agency? (Bonus if you name the Office of that agency)

What, if anything, is not in compliance with the regulations in this example? Hint: At least 2 environmental program areas are involved.

SCENARIO 4: Old rusty industrial drum containing an unknown waste.

Which Texas agency regulates industrial waste disposal in Texas? (Bonus if you name the Office of that agency)

What are some common waste classifications in Texas?

Describe the steps that would be required to properly dispose of this material in conformance with Texas law.

SCENARIO 5: Used oil management.

Which **two** regulatory programs typically regulate the management of used oil in Texas?

How is this storage area not in compliance with **either** of those environmental regulatory programs?

SCENARIO 6: Oil storage containment secondary containment drain valve.

Which **two** main regulatory programs regulate the management of oil secondary containment structures in Texas? (there are at least two and could be several more depending on what is in the containment).

How is this storage area not in compliance with **either** of those environmental regulatory programs?

Thanks & please email your answers to Alison@EnviroSteele.com to claim your training certificate!
