Cirrus9 Solutions

COMPANY OVERVIEW

Cirrus9 Solutions is an IT engineering company specializing in IT infrastructure, IT operations, cybersecurity, and 5G wireless technologies. Leveraging decades of experience, we strategically deliver comprehensive technology solutions to federal, state, and local government agencies, ensuring secure, and high-performance enterprise networks. Our consultative approach fosters seamless collaboration between internal teams and external partners, enabling us to meet stringent government requirements and compliance standards while exceeding project objectives.

CORE COMPETENCIES

Cirrus9 Solutions delivers innovative IT infrastructure and operations expertise, empowering government entities with robust, secure, and cost-effective technology solutions. Our core competencies encompass:

- Enterprise-grade IT infrastructure design and implementation
- Cloud and hybrid data center migration and optimization
- Advanced cybersecurity and 5G wireless integration
- Comprehensive IT operations management and support
- Data center, server, storage, and network engineering excellence
- Disaster recovery and business continuity planning
- Enterprise mobility solutions
- IT infrastructure cost optimization strategies

DIFFERENTIATORS

- Zero Trust expertise and continuous DoD compliance (RMF, CMMC 2.0, DFARS)
- Advanced threat detection with AI security and automation tools
- Highly certified team including CCIE and AWS Architects
- Strong DoD compliance expertise (FISMA, CC SRG, NIST)
- Integrated cloud, systems, and network engineering solutions

PAST PERFORMANCE

- Delivered software-defined networking, 5G, DR, and UCaaS for The City of Brownsville's infrastructure.
- Designed Zero Trust architecture with NAC for US Army C5ISR.
- Provided network operations and network security for National Defense University and Army Central Command.
- Designed secure cloud-enabled architecture for Space Force.
