

2020 Catalog Important Information 1/11/23

- “Door Style/Cabinet Color/Drawer Type” choices are all made in a single selection from the “Catalog Styles – Door Upcharge” selection Tab. This choice also triggers the matching price column for the reports - **do not** select from the “Price Levels” Tab.
- Fillers factory shipped are sold in 96” lengths both 3” & 6” wide which must be cut to size on-site as needed.
- Pulls or knobs for doors and drawers are included in 2020 “For Graphic Only” and are not included in the price.
- “Combo” vanity cabinets are shipped as the three SKUs in the Description.

The “Catalog Styles – Door Upcharge” selection Tab offers these choices:

- **SHGWSTDRW Shaker Glacier White Std BB Drw** – Standard Drawer Guides
- **SHGWUDSC Shaker Glacier White Metabox SC Drw** – Upgrade Drawer with Soft Close
- **SHMGSTDRW Shaker Modern Grey Std BB Drw**– Standard Drawer Guides
- **SHMGUDSC Shaker Modern Grey Metabox SC Drw** – Upgrade Drawer with Soft Close
- **SHSGSTDRW Shaker Slate Grey Std BB Drw**– Standard Drawer Guides
- **SHSGUDSC Shaker Slate Grey Metabox SC Drw** – Upgrade Drawer with Soft Close
-
- **SLGWSTDRW Slab Glacier White Std BB Drw** – Standard Drawer Guides
- **SLGWUDSC Slab Glacier White Metabox SC Drw** – Upgrade Drawer with Soft Close
- **SLMGSTDRW Slab Modern Grey Std BB Drw**– Standard Drawer Guides
- **SLMGUDSC Slab Modern Grey Metabox SC Drw** – Upgrade Drawer with Soft Close
- **SLSGSTDRW Slab Slate Grey Std BB Drw**– Standard Drawer Guides
- **SLSGUDSC Slab Slate Grey Metabox SC Drw** – Upgrade Drawer with Soft Close

If a selection is not made from the “Catalog Styles – Door Upcharge” selection Tab the quote will not be properly populated. **Do not** select from the “Price Levels” Tab, it is “automatic” based on the door menu selection.

When selecting individual base cabinets to place in a design there are no choices of SKUs to select the upgraded drawer box. That choice is triggered from the single selection made from the “Catalog Styles – Door Upcharge” selection Tab. However, the chosen drawer type will show up in the description on the quote. This also triggers the proper Manufacture Codes which are the codes needed to place orders. For Slab these are currently generic codes.

-continued-

An example of the description once the proper selection is made from the “Catalog Styles – Door Upcharge” selection Tab: “**B12** Base Cab Std Drw” will show up in the report when the standard drawer slide is selected. “**B12UD** Base Cab SC Drw” will show up in the report when the upgrade to Metabox is selected.

2020 Catalog Important Filler Information

- Fillers factory shipped are sold in 96" lengths both 3" & 6" wide which must be cut to size on-site as needed.

Our 2020 catalog includes special ".NC For Graphic Only" fillers to allow designing and pricing more accurately by adding the desired quantity of 8' fillers to the "Item List" for pricing while showing fillers in heights matching all cabinet heights for designs at No Charge. These can be selected with either long or short Floor Plan Codes even though the USERCODE is more descriptive to help with your selection such as UF330 for a UF396 so that you know the graphic is for a 30" high filler.

".NC For Graphic Only" fillers will show up on your quote as long as you turn on the option to "Show N/A or no charge accessories" on the "Pricing" Tab on the "Quote Options" report menu. The needed fillers to cover the amount of N/C fillers should be added to the "Item List" manually to include the actual quantity and to add the price of the fillers to the job. When printing or exporting your quote the N/C items have unique codes that call them out so that they can be identified as shown in the example on the next page. The first two fillers are N/C to only be used for the plan and elevations. The second two fillers are the actual filler that includes the price. The fifth filler is added to the Item List.

We have included different Floor Plan Codes for fillers to allow those that want the full SKU to show on the Floor Plan even when they are using N/C fillers for the design and adding the actual filler to the "Item List".

This allows the user to show a UF396 for every filler on the floor plan even if they are going to order a single filler and cut it into several pieces.

The user may want to show fillers with the W or B designation on the floor plan so they can see how many they are wanting to cut out of each full UF396.

The following example shows a 30" wall filler (4 versions) that from the drop down selection menu you see the size of the filler more defined, and a simple label on the floor plan if desired or the complete UF396.

The report on the following page shows that there are those with no price, and those with the full price. The line number on the report is next to the filler in the elevation view above the report image.

2020 Catalog Important Global Option Information

- Pulls or knobs for doors and drawers are included in 2020 “For Graphic Only” and are not included in the price.
- Multi-Global Options in the same design such as two colors or both types of drawer guides on the same plan requires 2 copies of the catalog with different names.

Pulls or knobs may be selected to show graphically for renderings when doing designs but are not supplied by Sauder. There are no prices included for these items.

As with most 2020 catalogs if the designer chooses to combine two colors of cabinets or moldings or use both Standard and Metabox drawers in one design a second copy of the catalog with a different name is used. This allows one design to include items with different global options and correct visual and pricing details.
