

PRODUCT PROFILE

NailPrep Dehydrator— This product will have three functions for the nail plate. Clean the surface of the nail, slightly and safely dehydrates the nail plate surface and lastly this product will pH balance the surface of the nail which creates a perfect setting for other products to be applied. Use this product before any other product during artificial nail application. This product is also safe to use before polish applications. **NailPrep** will not burn the client and works extremely fast.

Fusion Acid Free Bonder—Categorized as a Non-Acid Primer. This non-burning formulated bonder is excellent for all artificial nail applications but works exceptionally well for acrylic applications. No harsh odor. Safe for all nails. Great product for all climates. Soon to be a favorite product you simply can't be without. *A very reassuring product for clients since this product will not burn or harm if accidentally applied on skin.*

StylEnvy "Classic" Nail Form—Our custom design nail form is a favorite item with nail technicians globally. Use primarily for sculpture acrylic nail applications in salons or competitions this form can also be used for gel extensions as well. A universal finger cutout makes this nail form easy to use with all clients. See why technicians call this an instant **"Classic"**.

PRODUCT PROFILE

StylEnvy Monomer—Medium to fast set liquid includes cross linkers for self leveling. Extra adhesion ingredients to bond extremely well for a EMA base monomer. Very Low Odor for Professional Salons that want to cut down on smell. Optical enhancers to provide extra brighteners to our White Polymer. Receive a stunning transparent result with our remarkable Clear Polymer.

Polymer Clear—Strong, smooth and a easy product application is what to expect with this extraordinary polymer. Clarity, workability and adhesion is excellent. No yellowing, no chipping, no cracking. Simply stated it's the best clear polymer you will ever use.

Polymer Pink— Fast and self leveling cover pink is easy to use and finishes with remarkable results. Used for standard pink and white "French" applications. The pink color is a "Flesh" tone to match the true colors of the natural nail bed. Cover those fill lines during retouches or "Fills".

Polymer White—Bright white finish with excellent application control. StylEnvy Monomer is infused with a special optical brightener. This brightener reacts to our Polymer for a brighter white finish for French Manicure results. Also great for 3D designs.

PRODUCT PROFILE

High Gloss Top Coat—A thick lacquer top coat which is 100% air-dry. Use for all acrylic finishes. Top Coat blocks out Ultra Violet Rays and finishes with a high gloss shine. Fast drying time. Can be removed with most polish removers. Because of the thick lacquer base one coat is recommended.

Beyond Gloss Gel Top Coat—This UV Cured is the ultimate in durability and shine. Protect your nails from water and other contaminants that wear off normal top coats. Apply as a regular top coat finish to your acrylic nails and cure in a standard UV lamp for 2 minutes remove hand from the lamp and your service is complete. No wiping, no mess. Acetone Proof. To remove a light file or buffer is required. Shine and durability last for a solid two weeks.

Stik'Em Brush On Resin—Use this resin to apply Nail Blossom Flowers. This is one of the secrets to apply dried flowers to nails. This resin is designed to dry in 12-15 seconds allowing time to wrap and flatten the flowers to the nails. Use resin for all your other needs such as tip and wrap applications or use with glitter and rhinestones.

NailBlossoms Mini Dried Flowers— These very unique mini dried flowers are still the best when it comes to nail fashion floral designs. Use Nail Blossom for all nail services, Acrylic, Gel, Natural Nails and don't forget those toes. Fast fun and definitely a money maker. Each collection has 144pcs of your favorite flower colors.
