

****Lake update****

****Beauchamps Small Lake Closed****

We are continuing to monitor all club lakes through these very difficult weather conditions, the guys have been tirelessly testing the waters for low DO levels etc and deploying pumps with new Venturi outputs. This is a tireless and expensive job that we are doing to protect our fish stocks so please be patient and please take care of the fish when handling them, the keepnet ban is still ongoing until we have significant rainfall and water levels improve drastically.

The Committee with advice from the EA and other specialists are planning for the future and will have to invest more money to preserve our lakes and fish stocks going forward as this is not a one off situation. [See less](#)
