The Department of Immigration

To whom it may concern,

I write this letter to you in support of Dr Lisa Landymore-Lim's application to remain in Australia.

Dr Landymore-Lim was recently a guest on my radio programme. She was discussing 'Poisonous Prescriptions' and the allergies that many people have against many of the regularly prescribed antibiotics. The segment created enormous public interest and was very much to the benefit of the community.

Her indepth research and study into this particular subject is quite unique. Such a study obviously should have been undertaken some time ago and for the good of the nation should be continued.

Dr Landymore-Lim spent 40 minutes with me taking calls from listeners and judging by the volume of listners who wished to speak to her, we could easily have spent the whole morning discussing this issue.

I understand another good indicator of her unique knowledge of her subject is that her book, "Poisonous Prescriptions", is a best-seller.

I look forward to having her back on the programme as she deals with a subject not covered by anyone else and she does it with a great deal of professionalism.

I trust her studies will continue unabated and I believe she would make a useful addition to the Australian population.

I am available on either 08 300 1000 or 041 281 9000 to confirm these thoughts.

Yours sincerely,

Jeremy Cordeaux
