

## **GSK...took forever & a day**

With the NHS

People in the UK thought

That they would be blessed

Everyone a believer

Thinking that for asthma

All they needed was a reliever

Asthmatics thought it saved lives

Then at double the cost came the preventer

And GSK's CEO Emma Walmsley became the epicentre

The focus of a whirlwind of revenge

Asthmatics having been made to fear an attack

GSK funding a corrupt charity Asthma + Lung UK

So everyone needs to learn to avoid drugs

Oh yeah today company CEOs behave just like thugs

Many asthmatics have died and cried

But all GSK did was remain silent to deny

They don't care if babies children and adults suffer

All they want to do is lie

Inaccurate and incomplete information in their SPC

Wanting every smoker to be diagnosed with COPD

Probably incentivising doctors to prescribe

Just another way to bribe

So many corrupt heads and directors

With Jon Symonds a Fellow of Oxford as Chair

And a clinical trials unit at Cambridge

They must be convinced that GSK play fair

When GSK's drugs have maimed

They don't want to help

So I expect that some folks

When birth defects roll in

Find that they take forever and a day  
Pretending that everything is just fine  
Directors and CEOs of big Pharma  
Which like all businesses only exist to make a profit  
Will be getting their Karma  
As some believers will say  
To doctors they love to sell  
But when there's a problem  
Their attitude smacks of  
Everyone can go to hell  
Oh it's time that the bell of death  
For pharma did knell

GSK was found guilty in the USA  
Oh yeah \$3 Billion they had to pay  
And in China health officials they did bribe  
But against communism they couldn't hide  
In 2014 GSK was fined £297 Million  
And five GSK employees including Mark Reilly  
Were given sentences that would see them in jail  
Oh yeah many companies are corrupt too much greed  
While blue collar workers slave all day  
For insufficient pay  
So if you're considering taking part in a clinical trial  
Thinking that four grand will make you smile  
Beware while you haven't a care  
Because whenever injected or drugged  
You might find your throat in a noose  
Unable to breathe and unable to break loose  
Swelling like six who became Elephant Men  
In the TGN1413 trial in Northwick Park Hospital UK  
According to Google accidental injuries and death  
Sometimes seen in subjects enrolled in clinical trials  
Rule 122 DAB does not provide for compensation

So there'll be no dancing in the aisles
