

WHY BUY A HARMAN PELLET STOVE?

BOTTOM FEED VS. TOP FEED

BOTTOM FEED STOVE – Low Maintenance

Wood pellets are fed by an auger up into the fire pot, this motion then forces the ash out of the fire pot and into a large ash pan. A Bottom feed stove such as a Harman, allows for a much longer burn time, recommend shutting down to clean at least monthly and not every few days as with a top feed stove.

A bottom feed stove will burn any grade of pellet, even a high ash pellet without difficulty!

TOP FEED STOVE - High Maintenance

Wood pellets in a top feed stove are dropped down into the fire pot, the ash stays here until the operator empty's the fire pot and re-starts the stove. A top feed stove MUST be shut down every few days and cleaned, or the ash built up will smother the fire, and the stove will go out on its own.

A top feed stove requires a premium grade of pellet, with a low ash content. Any other wood pellet may require the stove to be shut down daily, cleaned, and restarted.

TEMPERATURE CONTROL: A room sensing probe helps to maintain a consistent room temperature. A Harman stove is fully automatic, automatically lights on it's own and shuts off as desired.

EASY CLEANING: A Harman stove does not have to be disassembled and cleaned. There are no hidden baffles. In fact , a quick cleaning could be performed on a Harman without even shutting the stove off, for example, one could clean the glass door while the stove was still running.

HARMAN WOOD PELLET STOVE - OUR #1 CHOICE - MAKE IT YOURS! With a Harman pellet stove, all you have to do is set the temperature and walk away. It really is that easy! The fuel rate and air flow rates are all adjusted automatically, unlike most other pellet stoves. With a Harman pellet stove, you will never experience the frustration in trying to set your fuel: ratio just right, as one does with a top feed stove.

Being in the Pellet business for 22 years, we have serviced/cleaned many different brands and models of wood pellet stoves. Hearing customer testimonials regarding the Harman and personally having one in our own home, we are confident in saying, "No pellet stove is easier to operate, clean or maintain than the Harman wood pellet stove."

WARRANTY . PARTS . SERVICE Harman takes pride in offering a 2 year "Part & Labour Full Warranty"!

Unlike the huge box stores, we carry a full line of parts, years of experience and knowledge, and take great pride in offering superior service - our up most commitment !

MAKE THE RIGHT CHOICE - THE FIRST TIME!

We hear of to many pellet stove's that have been purchased on impulse buying because of discounted prices, with the assumption that all pellet stoves are the same. Once customers are explained the difference between a Bottom Feed Stove vs a Top Feed Stove, there is truly only one choice, A HARMAN !

We sell both top feed stoves and bottom feed stoves, and would be pleased to show you how they differ, allowing you to choose which pellet stove would be of benefit to you, your budget and your lifestyle.

We understand that this is a large purchase and regardless of which pellet stove you choose, we promise to help make your experience with wood pellets enjoyable! Remember, "Pellet Heat Is Amazing!"
