

ANEMONES

The anemones arrive in closed bud form. Shipping them in a closed bud form protects the flowers. Shortly after hydration they will bloom beautifully. Upon arrival process them immediately by taking them out of the box and removing any plastic and rubber bands. Anemones are very delicate flower.

The stems are soft and have a natural bend to them. Have your vase or bucket (depending on quantity ordered) ready. Cut the bottom of the stems at a diagonal 1-2 inches with sharp shears and remove all foliage that will be in the water and

place them in water for hydration.

For longevity of the blooms re-cut and change the water every 2-3 days.

Stems Lengths	30 - 40 cm / 12 - 16 in
Bloom Sizes	Width 2 to 3.5 in / 5 to 9 cm
Vase Life	Average vase life with proper care and handling, approximately 5 days.
Seasonal	All year round
Special Notes	Anemones can be a phototropic flower, bending towards the light, and closing at night.

3-4 inch
