

GERBERAS

Upon arrival of your blooms please remove the protective covering placed on the bloom for shipping.

Cut the stems 1-2 inches and immediately place in a deep vase with water. Temperature is key to the longevity of the gerberas. Display your fresh cut arrangement in a cool dry place away from direct sunlight and drafts. Gerberas are thirsty flowers requiring the vase to be filled with plenty of water at all times.

Stems Lengths	50 cm / 20 in
Bloom Sizes	3 to 5 inches in diameter / 7.5 to 13 cm
Vase Life	Average vase life with proper care and handling, approximately 7 to 10 days.
Seasonal	Year Round
Special Notes	The exact color tones of this flower may vary to some degree.

3-4 inch
