

HYPERICUM

Prepare your buckets or vases of fresh clean water to place the Hypericum.

Cut the stems 1-2 inches from the bottom of the stem and place in the water for rehydration. To prolong the life of your blooms, re-cut the stems and refresh the water every 3-4 days.

Remove all the leaves below the water line.

Stems Lengths	Average of 20 inches to 27.5 inches / 50 to 70 cm
Bloom Sizes	Berry Size: 1/4 to 1/2 inch. / 0.6 to 0.8 cm
