

RUSCUS

Process the flowers as soon as they arrive by cutting the stems approximately 1 inch and remove any foliage that may remain below the water line. Immediately after the stems are cut, place them in the water with the hydrating solution.

After 2-3 hours of hydration, remove the corrugated sleeve. Allow the flowers to hydrate for another 4-5 hours before using.

Stems Lengths	40 - 50 - 60 cm / 16 - 20 - 24 inches
Vase Life	Average vase life with proper care and handling, approximately 10 to 12 days.
Seasonal	Year Round
Special Notes	Grower's bunch typically has 10 stems per bunch. Available Painted, Glittered. Can be dried and will last for months.

3-4 inch
