

A Rogue Processing Brand

MANITOBA GROWN AND PROCESSED

Introducing

Black Banana Cookies

Black Banana Cookies is a hybrid marijuana strain originally created by crossing Banana Fire Cookies and Blackberry Kush. This powerhouse strain produces big, frosty nuggets with vivid color profiles. When smoking Black Banana Cookies, you can expect to taste tropical bananas and berries with just a hint of cookie flavor. In our experience we can get color profiles from deep bright greens to thick purples.

Hand Trimmed / Whole Plant Hang Cured / Total Cure of over 20 days / Hand Fed

THC - 18-24%

Top 4 Terpenes

α -Humulene - This terpene has been used for centuries in holistic Eastern medicinal practices, and research has proven it to be an effective anti-inflammatory, antibacterial, and appetite suppressant. (Source - Leafly)

β -Caryophyllene - Studies on caryophyllene indicate a wide variety of therapeutic potential, including pain-relieving properties, antioxidant and anti-inflammatory properties.

Linalool - This terpene has been shown to reduce anxiety, stress and depression levels, and is also a great muscle relaxant.

δ -Limonene - This terpene has been shown to be beneficial in stress relief and mood elevation.
