MOI - Tested with USGA Protocols

**“No one had ever made a putter from Carbon. Using carbon gave us a chance to have a much bigger area of forgiveness.”**

Founder and CEO, Reed Dickens

# HEAD TECH FEATURES

## **Descending Loft Face Technology**

Our patented face technology milled into a 303 stainless steel face insert creates a more consistent and predictable roll.

## **Tungsten Weights**

90g heel and 106g toe weights allow improved MOI.

## **All-Carbon Body**

Body material is 5x less dense than steel, allowing for enhanced perimeter weighting.

## BLADE PUTTERS

### BEL-AIR SERIES

# BEL-AIR

FEATURING THE LARGEST SWEET SPOT EVER

The Bel-Air features a matte carbon head. The all-carbon construction, a material 5x less dense than solid steel, allows for a much larger area of forgiveness for off-center hits.

LA GOLF's patented Descending Loft Face technology features four descending degrees of loft to solve for consistency with launch angles and yields more predictable rolls.

Our P-Series 135 shaft comes standard, produces unmatched stability, and features anti-vibration material to create the signature feel LA GOLF is known for.

HAND	LENGTH	GRIP	NECK
Right	33", 34" 35", 36"	Undersize Standard Jumbo	Plumber

## BLADE PUTTERS

BEL-AIR SERIES

# BEL-AIR X

FEATURING THE LARGEST SWEET SPOT EVER

The Bel-Air X features a forged carbon head. The all-carbon construction, a material 5x less dense than solid steel, allows for a much larger area of forgiveness for off-center hits.

LA GOLF's patented Descending Loft Face technology features four descending degrees of loft to solve for consistency with launch angles and yields more predictable rolls.

Our P-Series 135 shaft comes standard, produces unmatched stability, and features anti-vibration material to create the signature feel LA GOLF is known for.

# MALLET PUTTERS

## MALIBU SERIES

# MALIBU

FEATURING THE LARGEST SWEET SPOT EVER

The Malibu features a matte carbon head. The all-carbon construction, a material 5x less dense than solid steel, allows for a much larger area of forgiveness for off-center hits.

LA GOLF's patented Descending Loft Face technology features four descending degrees of loft to solve for consistency with launch angles and yields more predictable rolls.

Our P-Series SoHo shaft comes standard, produces unmatched stability, and features anti-vibration material to create the signature feel LA GOLF is known for.
