

## How to light your WPPO Wood Fired Oven.

Add Starting media such as fire starter cube, or wood shaving fire starters.

Add a hand full of Pellets. Not to many to allow adequate air flow.

Light Fire Starter.

Put Pellet / Fire Box into the back of the Oven.

After Lit and in the Oven, slowly add Pellets until Fire Is sufficient. Do not add to many pellets at one time.

Then feel free to mix and match Charcoal, Wood chunks and or Pellets.

\* Allow the oven 10 - 20 minutes to heat, to get baking stone up to cooking temperature.
