# Tefute® Stone Coated Steel Roofing System

Tefute welcomes you to a world of elegant roofing solutions, offering decades of dedicated experience in researching, developing, and producing stone-coated steel roofing systems. By combining state-of-the-art technology with premier raw materials, we're able to provide superior performance and world-class reliability. We're committed to serving our customers with high-quality products, delivering excellence and innovation that drives the roofing industry forward.

## Smart Steel Choice

Our passion for going above and beyond allows us to meet and exceed standards set by the industry. We let our work speak for itself, maintaining a healthy relationship with our clients built on trust and safety. With quality system certifications such as ES-ICC and ISO 9001 and lifetime warranties, we guarantee that you're in safe hands.

Lifetime Limited Warranty.

Class-A Fire Rated materials, strict fire code preventing fire from spreading.

Class 4 Impact Resistance, UL2218, protecting from hail storm.

Engineered to withstand hurricane speed up to 130 MPH.

Durable lightweight materials no affect to collapse during intense earthquake.

## Energy Efficiency

The design of batten style installation creates significant space between installed roof tiles and the roof sheathing. This space minimizes heat transfer to attic area, that leads to cooler interior in hot climates and prevent ice damming during cold environments.

# Roman

Tefute® Roman Profile captures the timeless beauty of traditional tiles but only a fraction of the weight.

# Wood-Shake

Wood Shake Profile is uniquely formed from anti-rusting and anti-corrosive materials that are suitable for any style of home.
