Purpose

SECKO is committed to fostering environmental sustainability in all our services and operations. We aim to minimise the environmental impact of our operations and to deliver solutions that contribute positively to the environment and society.

Scope

This policy applies to all employees, contractors, and stakeholders engaged in our projects and operations. It covers all activities related to engineering consulting, including planning, design, project management, and on-site assessments.

Policy statement

At SECKO we prioritise environmental responsibility across all our projects. To achieve this, we are committed to the following principles.

1 Sustainable Design and Solutions

Integrate sustainable practices into our engineering solutions, promoting energy efficiency, resource conservation, the use of renewable materials and other circular economy principles. We strive to deliver projects that not only meet client requirements but also enhance environmental outcomes.

2 Compliance and Standards

Adhere to all relevant environmental laws, regulations, and standards. We will stay informed of changes in environmental legislation and ensure our practices are always compliant.

3 Pollution Prevention and Waste Reduction

Implement strategies to prevent pollution and reduce waste in all phases of our projects. This includes minimising emissions, managing waste responsibly, and adopting practices that reduce the environmental footprint of our operations.

4 Resource Efficiency

Use resources such as energy, water, and materials efficiently in our offices and on project sites. We will actively seek ways to reduce consumption and promote the use of sustainable resources.

5 Continuous Improvement

Commit to ongoing environmental performance evaluation and improvement. We will set and review environmental objectives and targets, using them to guide our actions and measure our progress.

6 Employee Involvement and Education

Engage and educate our employees on environmental issues and best practices. We will provide training and resources to ensure our team is equipped to contribute to our environmental goals.

7 Collaboration with Clients and Partners

Work closely with clients, partners, and suppliers to promote environmentally sustainable practices throughout the project lifecycle. We will encourage and support our clients in adopting green engineering solutions.

Responsibility

The Directors of SECKO are responsible for the implementation and ongoing review of this Environmental Policy. All employees are expected to support and adhere to this policy, actively contributing to its objectives.

Review

This policy will be reviewed annually to ensure it remains relevant and effective in achieving our environmental commitments.

Approval

This policy has been approved and endorsed by the Directors of SECKO.
