

MANAGEMENT | ADVISORY | DESIGN

At SECKO we achieve successful outcomes through collaboration and engagement. We work closely with our clients and stakeholders to fully understand their needs and develop robust solutions. We believe transparency, accountability and results are the cornerstone of success.

For almost 20 years, our team members have been a leading force in designing and managing critical infrastructure projects that connect communities and propel economies. Our expertise spans across a wide range of infrastructure solutions and is underpinned by our belief in equality, sustainable design, user-centric approach and social value.

01 PEOPLE

At SECKO our people are our most **valuable asset**. We foster an innovative environment and take pride in looking after our staff, clients and partners.

02 LEADERSHIP

Project Leadership including **Project Management**, Design Management, Risk Management, Asset Management and Stakeholder Engagement, Infrastructure and Implementation Advisory.

03 ENGINEERING

Infrastructure **Engineering Design and Documentation**, considering technical specifications, environmental, economic, and social impacts. Utilities, drainage, roads, paths and pavements.

04 INFORMATION

We provide specialist consulting in **Information Management**, the use of Common Data Environments and Electronic Document Management Systems

Our experience spans multiple sectors across Australia and Southeast Asia

HIGHWAYS

We design efficient highways and local roads, ensuring safety and smooth traffic flow. Our experience covers planning through to detailed design on projects including SAFELink, Airport Link, Brisbane Airport access roads and the Transport Network Reconstruction Program. Our work on highways extends into the active travel domain and includes the Scrubby Creek cycle path.

RAIL

We deliver sustainable light rail systems that reduce congestion and create vibrant, connected communities. Our experience includes Gold Coast Light Rail detailed design, Canberra Light Rail reference design and a concept design for a new light rail system in Asia.

PRECINCTS

We design the vital civil infrastructure that supports sustainable, well-connected precincts. Our approach includes a holistic view of transport modes, access, civil utilities and drainage. Our experience spans across sectors including Health, Arts & Culture, Education and Sport.

TECHNOLOGY

We engage in a collaborative approach, working closely with our clients and partners to diligently customise technology that not only aligns with the specific needs of each project but also integrates seamlessly to enhance productivity and streamline operations. By doing so, we aim to deliver superior value, foster innovation, and drive efficiencies that propel our clients towards achieving their strategic objectives in an ever-evolving digital world.
