If you order the optional EagleView Wall Report, the presentation will be organized into 4 separate elevations. If you are not ordering the EagleView Wall Report, you may still breakdown your information into the 4 elevations. That is a better estimating practice. Depending on where you put the quantities, your information will be included in your estimate in either a general exterior section, or on the elevation that you specify.

Quantities available from the EagleView Wall Report are indicated with an \* and you can leave blank if also ordering the EagleView Wall Report
