## PROFESSIONAL

Front Side  
Brass burners

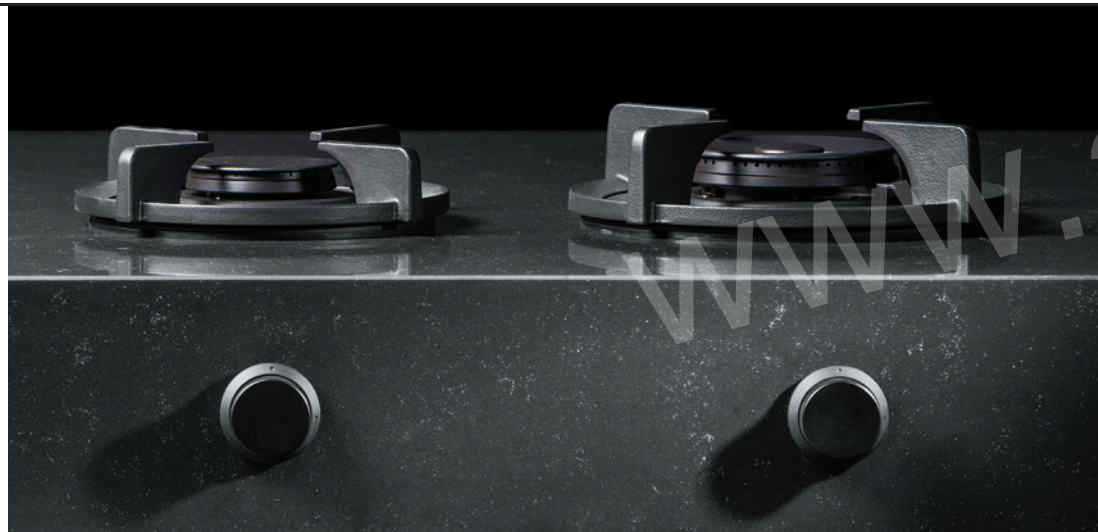

All front side control model knob units require location specific ordering for each individual installation based on counter thickness, set back and knob height location.

Each order requires a specialized order form be filled out prior to final order and are none refundable or returnable once ordered.

Please talk with your sales person for details and ordering.

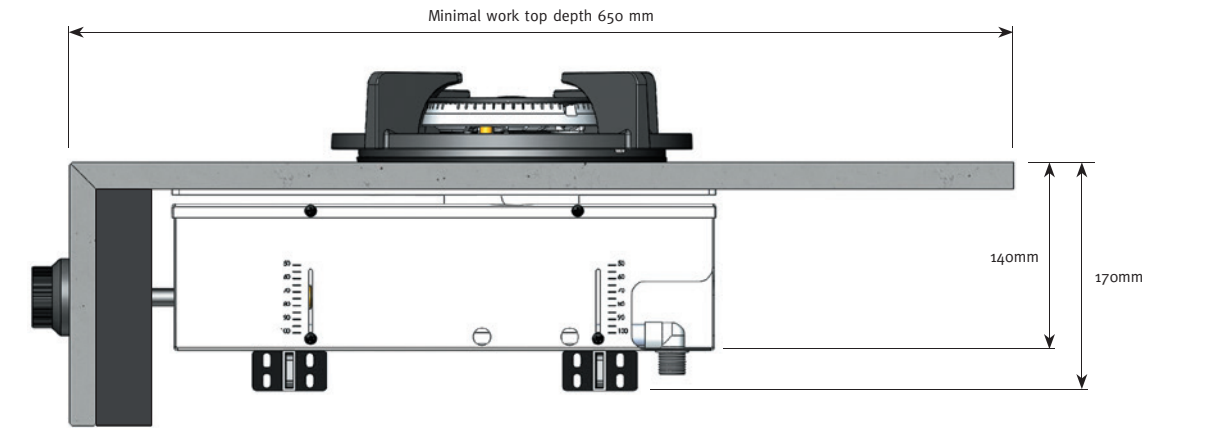

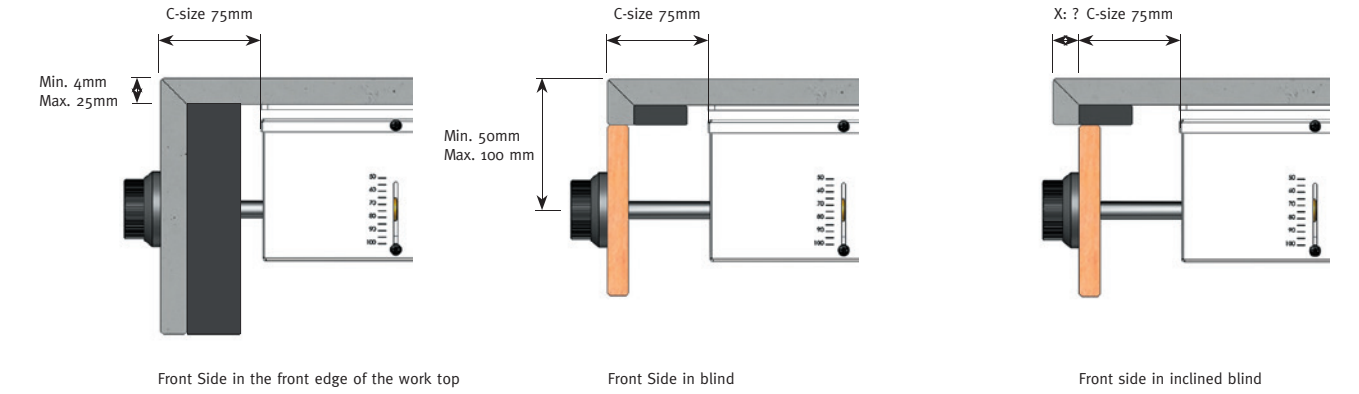

## BLACK EDITION

Front Side  
Black burners

### Knobs on the front of the countertop or kitchen front

PITT cooking Front Side: the powerfully, integrated burners on the work top, the operating buttons are moved to the front side. More space on the countertop and a minimalistic look. Fully customized: the position of the knobs is adapted to the work top and kitchen fronts. Completely according to the wishes of the customer. Front Side is available in all models.

Front Side can be applied to the front side of the work top as well as the blind of the kitchen cabinet (whether indented or not). The designs above show the required measurements. The center-to-center measurement of the knobs depends on the situation, and the C-measurement is fixed.
