# Why Choose Our Security Cameras?

Our advanced AI-powered security cameras are designed to provide unmatched surveillance for both residential and commercial properties. Whether it's day or night, rain or shine, our cameras keep an unblinking eye on what matters most.

## 1. Hi-Resolution Video up to 8K

Our system provides up to 4K (8MP) Super Hi-Resolution images, ensuring stunning visuals both live and during playback. With this level of detail, you'll be able to capture any potential criminal activity with precision. Additionally, our integrated YouTube interface allows you to stream live footage with audio from any security camera in your system in high definition.

## 2. Built-in Active Deterrence

One of the standout features of our camera system is the integrated active deterrence included in every unit. With this capability, you can prevent issues before they arise. Each camera is equipped with a built-in red and blue warning strobe light, a spotlight, and a siren. You can activate all three warning systems manually via the app or set them to operate on a specific schedule, creating a progressive warning response if an intruder is detected.

## 3. Two-way Voice

Each camera not only features active deterrence but also has the capability to record audio. Additionally, it comes equipped with a built-in speaker, enabling you to communicate with someone through the app.

### System Options
