As a member of the Florida Ground Water Association I was alarmed to hear of proposed regulations intended to restrict construction of private irrigation wells.

I work for a well rehabilitation manufacturer, Cotey Chemical Corp, Florida is a very important part of our business, we serve distributors and private water well contractors and this proposed regulation would have a serious and detrimental effect on my customers. I have attached a letter outlining the issues that FGWA has with this proposal and ask that they be taken into consideration before the approval of such a radical and invasive regulation.

Regards,

Mike Whittaker
