

# What do you know?

Let's test your knowledge on peanut facts! Mark the circle to answer if each statement is True or False.

## Mark True or False

1. Peanuts are not nuts.  
☐ True ☐ False
2. Peanuts are a good source of protein.  
☐ True ☐ False
3. Peanuts grow underground.  
☐ True ☐ False
4. There is no butter in peanut butter.  
☐ True ☐ False
5. Peanuts are grown in cold climates.  
☐ True ☐ False
6. Peanut crops improve the soil.  
☐ True ☐ False
7. No part of the peanut goes unused.  
☐ True ☐ False
8. Peanuts require more water to grow than any other nut.  
☐ True ☐ False
9. It takes over 500 peanuts to make a 12 oz. jar of peanut butter.  
☐ True ☐ False
10. In 1971 astronauts took a peanut to the moon.  
☐ True ☐ False

## The First "Astro-Nut"

Did you know that a peanut flew to the moon and back? In 1971 Astronaut Alan Shepard was asked by a restaurant owner to take one of the roasted peanuts from the restaurant into space.

The commander of Apollo 14 kept the peanut and took the legume on his next space mission. Sheppard, the first American in space, returned the peanut back to the restaurant owner calling the peanut the first "astro-nut" to travel to the moon.
