

MOJOTONE TUBE AMP BUILD WORKSHOP

Roberto-Venn School of Luthiery

SATURDAY, June 22nd, 2019 – SUNDAY, June 23rd, 2019
(10:00 am - 6:00 pm)

WORKSHOP DESCRIPTION: Hosted at the **Roberto Venn School of Luthiery** and lead by Mojotone's Production and Tech Manager Andy Johnson, this two-day program will take you through a classic "Tweed Style" amp build where you will learn soldering techniques, general amp circuit theory and an overview of what makes the "5E3" circuit a ubiquitous blueprint for countless amplifiers.

You will be guided through the build process, learn to read a wiring diagram and be shown how to use a schematic. Instructors are on hand to quickly address any questions and to help troubleshoot issues if you run into a problem.

By the end of the two-day workshop, you will have hand wired your very own tube amp to enjoy for years to come and have a better understanding of what makes a tube amp so special.

All tools and shop supplies will be provided for your use during the class.

Fee: \$999.00 - Includes Mojotone 5E3 Style Tweed Combo Amp Kit, two-day Amp Build Workshop and catered lunch.
