About Us

Founded in 2020, HJSTINC has swiftly emerged as a leader in the computing industry, renowned for our expertise and proficiency. Our diverse experience with various customers and projects has solidified our reputation for delivering solution-centric services.

Our journey from computing competence to networking and application mastery has culminated in the seamless integration of multi-product solutions, perfectly tailored to meet specific customer needs. This evolution has propelled HJSTINC to the forefront of the country's ICT solutions providers.

At HJSTINC, we pride ourselves on our proficiency with global best-of-breed ICT products and solutions. Our extensive experience in integrating a wide range of products enables us to design solutions that precisely address our customers' unique requirements, ensuring value-engineered and cost-effective results. Our team, enriched with multi-industry workflow experience and certified technical competence, is dedicated to delivering exceptional service.

HJSTINC Highlights

- Established Expertise: Founded in 2020, we have rapidly built a strong presence in the ICT sector.
- Diverse Experience: We serve a wide range of customers and projects, ensuring we can meet varied business needs.
- Integrated Solutions: Our evolution from computing to networking and application competence allows us to provide seamless, multi-product solutions.
- Best-of-Breed Products: We leverage top global ICT products to craft tailored, value-engineered, and cost-effective solutions.
- Certified Competence: Our team boasts technical certification and extensive industry experience.

Our Values

MISSION

To be an instrument for all our client’s success.

VISION

To provide quality products and ensure comprehensive support to clients both before and after sales. To offer cost-effective, innovative products and services tailored to each client’s needs.

EXCELLENCE

Deliver exceptional client results. Reward and recognize performance, relentless pursuit of improvement.

PASSIONATE

Passionate to offer the the best solution for client’s requirements and pushing ourselves beyond our limits as we meet our challenges with optimism and hard work.

INTEGRITY

Integrity is the foundation for everything we do. We are respected for our commitment to honesty and trust.

ACCOUNTABILITY

We are responsible for our words, and actions, and take pride in our work measuring personal and client results.

INGENUITY

We are devoted to keep our word and honor out commitments.

CORPORATE RESPONSIBILITY

We are committed to corporate responsibility through sustainable practices, community engagement, and employee well-being. We minimize environmental impact, support educational and social initiatives, and provide a safe, inclusive workplace with opportunities for professional growth and work-life balance. Our goal is to positively impact our environment, communities, and employees, driving sustainable growth

HYPER-CONVERGED

Hyper-Converged Infrastructure or HCI decreases the number of hardware used all while increasing the scalability and manageability of the User's Data Center. Hyper-convergence is a method to simplify your Data Center without sacrificing its reliability and performance

IT PERIPHERALS & CONSUMABLES

Scanners, Projectors, Projector Screens, Fax Machines, AVR, Windows Operating Systems, Softwares, Large Format Display, Video Conferencing Audio Video, Wired, and Wireless Digital Signal, LED, Interactive Whiteboards, Output Devices (Monitor, Multi-function Printers, Plotter and Large Format Printer, POS Peripherals (Scanner, Receipt Printer, Customer Display, Cash Drawer), Harddrive and Flash Drive, Desktops, Workstations, Laptops, Tablets, and Handhelds devices.

SERVERS AND STORAGES

- Tower, Rack and Blade Servers.
- Network Attached Storage (NAS)
- Storage Area Network (SAN)
- Just a Bunch of Disk (JBOD)
- Locally Attached Storage

VIRTUALIZATION

Virtualization primarily turns the user's hardware into its virtual version. The act of Virtualization enables the users to increase utilization and scalability of the resources and environment

Computer Hardware Platform and Server and Storages.

COMPUTING

HJ STRUCTURED TECHNOLOGIES

APPLICATION AND NETWORK PERFORMANCE

- Load Balancers and Bandwidth Managers
- Integrity Testing
- Virus and Malicious Software Testing
- Repeaters

NETWORK SECURITY

- Security Internal Network
- Firewall
- Anti-Virus
- Access Control
- Application Security
- Behavioral Analytics
- Email Security
- Data Loss Prevention
- Intrusion Prevention System
- Mobile Device Security
- Network Segmentation
- Unified Threat Management
- VPN
- Web Security
- Email Security
- Wireless Security

ROUTERS AND SWITCHES

Our strategy is to utilize a layered approach or structure consistent with the Open System Interconnection (OSI) model. We listen to our customer requirements and design solutions that meet their specific needs providing a vast array of Core Routers, Distribution Switches, Edge Switches.

WAN ACCELERATION AND OPTIMIZATION

WAN Acceleration / Optimization is used to improve the accuracy of the flow of Data across the Wide Area Network to and from the Centralized Data Center to other remote locations. By Accelerating / Optimizing the WAN, users can now access data and information much quicker. WAN Acceleration / Optimization helps:

- Fix Network Latency
- Minimize Packet Loss
- Mitigate Limitations

ACCESS POINTS AND CONTROLLERS

Access Points are the portals that enable the devices to connect to the Local Area Network (LAN). APs are also responsible for the extension of Network Coverage and increase in the number of users that can connect to a Network. Controllers are used to managing the Access Points. Through the help of HJSTINC, we can ensure a seamless and hassle-free connectivity.

NETWORKING

HJ STRUCTURED TECHNOLOGIES

PHYSICAL INFRASTRUCTURE

- Racks and Cabinets: High-quality, secure racks and cabinets to house and protect our equipment.
- Raised Flooring: Advanced raised flooring systems for efficient cooling and cable management.
- Structured Cabling: Robust structured cabling for reliable and high-speed connectivity.
- Main Power and UPS: Uninterrupted power supply systems to ensure continuous operation.
- Cooling: Efficient cooling systems to maintain optimal equipment performance.
- Cable Tray and Ladders: Organized cable tray and ladder systems for streamlined cable management.

SOFTWARE & APPLICATIONS

We offer a comprehensive range of software and applications designed to enhance your business efficiency. Our portfolio includes diverse software licenses and subscriptions from leading global providers, ensuring you have access to the best tools for your specific needs.

We support you through every step of the process:

- Pre-Sales Consultation: Our experts help you identify the right software solutions to meet
- your business objectives.
- Purchase: We offer competitive pricing and flexible licensing options to suit your budget and requirements.
- Installation: Our team ensures a smooth and hassle-free installation process, minimizing downtime.
- Post-Sales Service: We provide ongoing support and maintenance to keep your software running optimally.

PHYSICAL SECURITY

- Biometrics: Advanced biometric systems for secure and reliable identity verification, ensuring only authorized personnel access sensitive areas.
- CCTV and Visual Equipment: Continuous monitoring with high-resolution surveillance cameras to cover critical areas, detect, and deter unauthorized activities.
- Door Access Control: Sophisticated door access control systems to restrict and monitor entry, enhancing security for sensitive zones.
- RFID: RFID technology for efficient tracking and management of assets and personnel within our facilities.
- Time and Attendance: Integrated systems to accurately track employee time and attendance, promoting accountability and security.
- Turnstiles: Secure turnstile systems to manage and control the flow of personnel entering and exiting the premises.
-

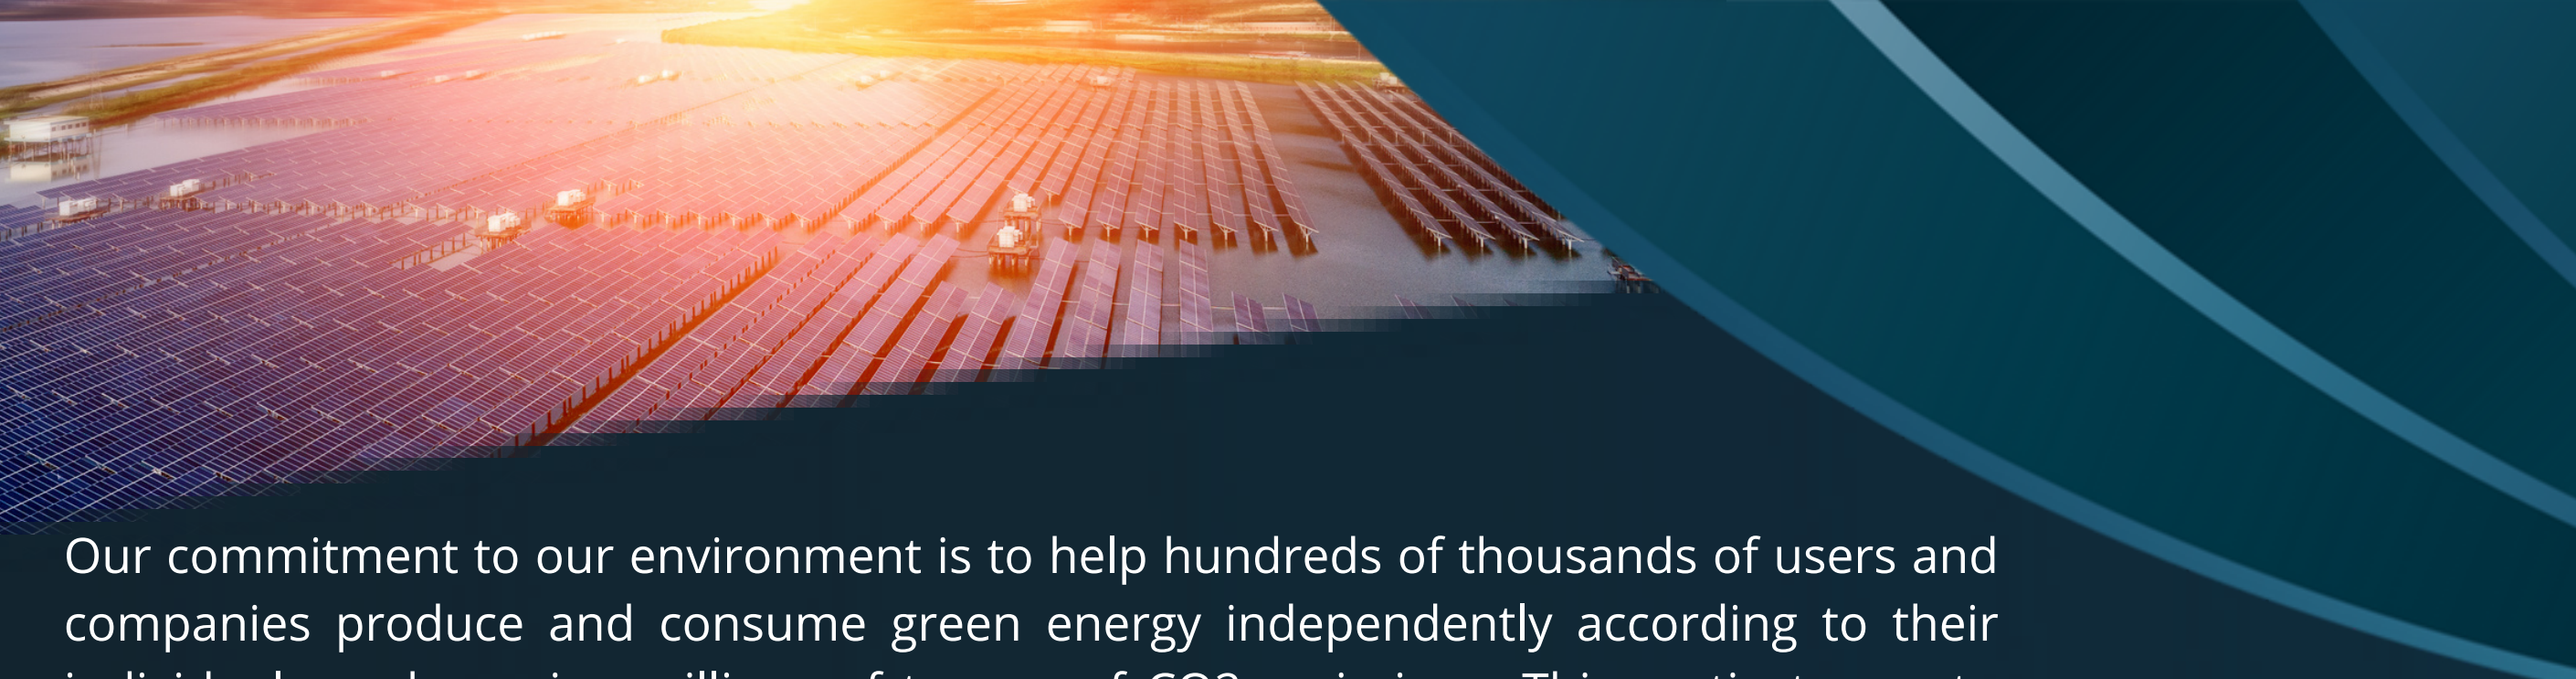

PHYSICAL

INFRASTRUCTURE

HJ STRUCTURED TECHNOLOGIES

Our commitment to our environment is to help hundreds of thousands of users and companies produce and consume green energy independently according to their individual needs, saving millions of tonnes of CO2 emissions. This motivates us to continually strive to create and innovate, on the universal carbon neutralization goal, and also a greener future that is energized by renewable energy technology.

Peak shaving

Utilize electricity price difference, charge battery at low price and discharge at high price to maximize system profit, compensate local transformer limit

Back Up

Storage battery provide back-up power supply for unstable grid, during grid failure, seamless switches to off-grid mode within 20ms to realize uninterruptable supply

Micro-Grid

Rural areas, home, shop, school or villa use, majorly realize self consumption from solar, support automatic DG connection and control as back-up power

Large scale off-grid

Rural areas, home, shop, school or villa use, majorly realize self consumption from solar, support automatic DG connection and control as back-up power

Grid Support

Voltage, PF, Frequency regulation for traditional thermal power plant by supplying or absorbing active/reactive power to or from the grid on demand

Renewable energy firming

Firm renewable energy source to avoid grid inrush, reduce energy waste caused by renewable limitation by storing energy in battery, maximize system profit
