

DOOR CONTROL UNITS

Repair and/or interval maintenance

...developing tomorrow's ideas®

> HI-TEC

RELIABLE, EXPERIENCED, GOOD

Established in 1987, we are specialized in technical parts and accessories. With over 30 years of experience, we provide high-quality service by importing, exporting, and distributing products worldwide. Our efficient operations ensure cost savings while maintaining quality.

OUR CORE VALUES:

We promote customer and supplier growth through support and technical expertise while maintaining sustainable profitability for steady growth and service quality.

OUR RANGE OF SERVICES

Repair service

We completely replace all defective components of your door control units so that you are quickly up and running again.

Interval maintenance and stabilization

- Preventive measures at 5- or 10-year intervals: cleaning and replacement of all critical electrical components such as relays, electrolytic capacitors, optocouplers and current sensors.
- Can be combined with repair measures for maximum safety and durability.

Exclusive advantage

- We have stocked up on discontinued components - so we can also find the right solution for older systems.
- Environmentally friendly repairs: We rely on sustainable processes and the reuse of functional components wherever possible.
- Fast repair times: Minimal downtime for maximum efficiency.

QUALITY YOU CAN COUNT ON

-  COMPLETE FUNCTIONAL TEST
-  CREATION OF A TEST REPORT
-  FAST AND SUSTAINABLE SOLUTIONS

DURABILITY AND SAFETY FOR YOUR DOOR CONTROLS!

To ensure that your door systems function reliably, we recommend regular maintenance or overhauls every 5 to 10 years. This keeps your systems up to date at all times and minimizes failures and disruptions in operation.

Rely on prevention - for trouble-free operation!

Known fields of application

Our range of services covers all current models of well-known train manufacturers (Alstom, Siemens, Bombardier, Stadler, etc.) and door control systems of all makes.

Examples:

- Alstom Coradia LINT 27/41, Alstom BR640 / VT640, Alstom BR648 / VT648, Alstom Citadis
- LTG 534880 door control unit for VT640 and VT648, each door / 527502 control unit for VSST; VT640, each door
