Do you plan on setting the ears*? Yes / No *Setting the ears: The ears are trained by primarily gluing the puppy's ear to the skull. This is done to shape the ear to hold the characteristic folded tip. It does not hurt the puppy. Breed standard calls for a folded tip. Show breeders do that (same with collies and shelties) to make sure the ear conforms to the standard. **If yes, I can instruct you on the proper way to set the ears.**

How will you provide for your dogs need for outdoor exercise? _____

Are you interested in any of the following activities with your dog?

Companionship _____ Confirmation showing _____ Agility _____ Obedience _____
