the Spirit of Fire?

Cultures around the world have worked with fire as a rite of passage, spiritual connection, as a teacher, the one that warms our heart and hearths.

When woman gather around the fire; Magic arises.
As woman we dance the fire. We let our wild nature be free.

In order for something new to be born, something has to die. It's our natural cycle of death & rebirth, destruction & creation. This is our pathway for transformation.
