breed of the month! BULL TERRIER

Did You Know? Fun Fact About Bull Terriers!

Bull Terriers are instantly recognisable thanks to their unique **egg-shaped head** and **small triangular eyes**. Originally bred in 19th century England, they were developed by crossing Bulldogs with various terriers to create a strong yet agile dog. Over time, these pups became more known for their **strength, loyalty, and bubbly personalities**

Characteristics:

Bull Terriers are muscular with short, glossy coats that come in white or a variety of colours and patterns. Their signature head shape and confident stance make them stand out. Despite their strong build, they're often described as playful and charming.

Temperament:

Bull Terriers are known for their bold and fun-loving nature. They thrive on companionship and love being involved in family activities. While they can be stubborn at times, they're incredibly loyal and thrive with consistent, positive training.

A Bit of History:

Originally bred for dog fighting, Bull Terriers were later refined into loyal companions and even fashion icons—often seen alongside gentlemen in Victorian England. Today, they're adored for their quirky character, deep devotion to their humans, and unmistakable appearance.

Size : Medium

Loveable Factor : 🐾 🐾 🐾 🐾 🐾

A GUIDE TO A TAIL WAGGINGLY SAFE SUMMER!

As the summer sun starts to shine, it's the perfect time for **garden play, beach days, and sunny strolls**—but the rising temperatures can also pose **serious risks** to our furry friends. Here's how to help them stay safe and cool:

 **Heat Awareness:** Dogs can overheat quickly, especially short-headed breeds (like Bulldogs and Pugs), older dogs, and puppies. Avoid walking your pup during the hottest parts of the day, and always ensure they have **access to shade and fresh water**.

 **Pavement Check:** Surfaces can become scorching hot and **burn your dog's paws**. A good rule to go by: If it's too hot for your hand, it's too hot for their paws. Stick to **grass or shaded routes** whenever possible.

 **NEVER Leave Dogs in Cars:** Even on mild days, cars can heat up fast. Leaving a dog in a car, even for a short time, can be **fatal**. If your pup can't come with you, it's best they stay safe at home.

 **Cooling Ideas:** Use cooling mats, damp towels, shaded areas, and even frozen treats to help your dog stay comfortable on warmer days. Paddling pools can be a fun and refreshing way to cool off too!

With just a **few simple precautions**, you and your pup can enjoy a tail-waggingly safe start to summer! 🌞🐾💧

"In a world full of sunshine, be the reason someone's tail wags."
