7. Description of the project (3000 characters limit)

   The general objective of the EDU-ARCTIC project is a cross-country adaptation of innovative practices in science education in Europe. EDU-ARCTIC provides a custom-designed large-scale program to strengthen schools ' science education. EDU-ARCTIC uses innovative online tools for interactive open-access available for everyone to link Arctic research and school education in Europe. The program is dedicated to young students in the age of 13 to 20 and their teachers. The program will be based on 5 main components: 1) Broadcasts (webinar transmissions) of online lessons from polar stations on natural sciences and polar research related to important societal challenges; 2) " Polarpedia " – an online developing encyclopaedia with scientific expressions, educational resources and dictionaries in at least 5 national European languages; 3) Arctic competitions for European pupils cooperating with their teachers, in which prize winners will be able to participate in polar expeditions; 4) Monitoring system: all schools in Europe will be invited to participate in a program based on monitoring of observation in schools ' surroundings; 5) Teachers workshops and trainings.
