ASM2 Project Deliverable Update

Submitting Country/Organization Italy

1. Project Title (150 character limit)

   ReCAP and EastGRIP project

2. Funding Program(s) and/or Organization(s)

   (Italian side) CNR, University Ca' Foscari (Venice)

3. Coordinating organization(s)

   CNR

4. Name of main contact person

   Carlo Barbante

5. Contact email address

   barbante@unive.it

6. Summary of Project/Project Goal (300 character limit)

   The ReCAP and EastGRIP international projects are looking at ice cores from Eastern Greenland to understand past climate as well as past sea ice extent. Results from the ReCAP core have been submitted to Nature and the EastGRIP project starting drilling in 2017.

7. Description of the project (3000 characters limit)

   Although climatic changes are evident on a global scale, in the Arctic these changes have been amplified. Advances in laboratory analysis methods have been applied to ice cores to help us understand the mechanisms governing this fragile environment in a changing world. Ice cores are unique archives of our past climate able to trap air bubble as well dust particles present in the past atmosphere. Understanding past atmospheric condition and its changes trough the time can strongly help in understanding the actual changes in our climate as well help in predict the future scenario. The ReCAP project (Renland ice core project), has the aim to collect an ice core from the estern part of Greenland. The location of the drilling, the Renland ice cap, is particular sensible to the marine related processes preserving in ice important information of ocean related process, such as the change in sea ice extension, the variation in prymary productioni and full record of north emisphere temperatue back to the Eamian. Reconstracting the past sea ice changes in the eastern coast of Greenland back to the Eamian could have important implication to better understand the forcing causing the rapid sea ice retreat recorded in the modern time. The EastGRIP ice core project has the aim to recover an ice core archive in the north east of Greenland to reconstruct the atmospheric condition back to 50 ky BP. This core, considering the location of the drilling, can also be used to reconstruct the oceanic process in the North Atlantic. Another aim of this projetc is to understand the ice flow dynamic and the change in the ice speed velocity connect with the warming of the Greenland ice sheet. The results that

9. Duration of Project (YYYY to YYYY)

   to

10. Personnel/Staff Involved

    1 - 10
    11 - 20
    21 - 50
    More than 50
    Unknown

11. What is the diversity of project personnel/staff (E.g. gender, career stage, Indigenous representation) (1500 character limit):

12. Stage of Project Development

Proposed
Early Planning
On Going
Final Stages
Finished

13. Next steps for the project if in the proposed, early planning or ongoing stages (1500 character limit):

14. Major progress/developments since ASM2 (1500 character limit):

15. Are there opportunities for new collaborators to join? If so, please describe them. (1500 character limit)

16. Collaborating Countries/Governments *(Choose all that apply)*

- ☐ Austria
- ☐ Belgium
- ☐ Canada
- ■ China
- ☐ Czech Republic
- ■ Denmark
- ☐ Faroe Islands
- ☐ Finland
- ■ France
- ■ Germany
- ☐ Greenland
- ■ Iceland
- ☐ India
- ■ Italy
- ■ Japan
- ☐ Netherlands
- ■ Norway
- ☐ Poland
- ☐ Portugal
- ■ Republic of Korea
- ☐ Russia
- ☐ Singapore
- ☐ Spain
- ■ Sweden
- ■ Switzerland
- ☐ UK
- ■ USA
- ☐ EU
- ☐ Other(s):

17. Location of Project *(Choose all that apply)*

- ☐ Global
- ☐ Polar in General
- ☐ Arctic in General
- ☐ Sub-Arctic in General
- ☐ Alaska in General
- ☐ Alaskan Arctic
- ☐ Canadian Arctic in General
- ☐ Yukon
- ☐ Northwest Territories
- ☐ Nunavut
- ☐ Nunavik
- ☐ Labrador
- ☐ Greenland
- ☐ Iceland in General
- ☐ Icelandic Arctic
- ☐ Faroe Islands
- ☐ Norway in General
- ☐ Norwegian Arctic
- ☐ Svalbard
- ☐ Sweden in General
- ☐ Swedish Arctic
- ☐ Finland in General
- ☐ Finish Arctic
- ☐ Russian Arctic in General
- ☐ Eastern Siberia
- ☐ Western Siberia
- ☐ Arctic Ocean in General
- ☐ Central Arctic Ocean
- ☐ Bering Sea
- ☐ Chukchi Sea
- ☐ Beaufort Sea
- ☐ Hudson Bay
- ☐ Labrador Sea
- ☐ Davis Strait
- ☐ Baffin Bay
- ☐ Denmark Strait
- ☐ Norwegian Sea
- ☐ Greenland Sea
- ☐ Barents Sea
- ☐ Kara Sea
- ☐ Laptev Sea
- ☐ East Siberian Sea
- ☐ Sea of Okhotsk
- ☐ North Pacific Ocean
- ☐ North Atlantic Ocean
- ☐ No Geographic Orientation
- ☐ Other Regions

18. Keywords describing the Deliverable/Project *(Choose all that apply)*

- ☐ adaptation
- ☐ art
- ☐ atmosphere
- ☐ atmospheric sciences
- ☐ biodiversity
- ☐ biology
- ☐ capacity building
- ☐ carbon
- ☐ change
- ☐ climate
- ☐ collaboration
- ☐ communication
- ☐ community
- ☐ community driven
- ☐ coordination
- ☐ cryosphere
- ☐ culture
- ☐ data management
- ☐ disease
- ☐ ecology
- ☐ economic development
- ☐ ecosystems
- ☐ education
- ☐ fisheries
- ☐ food security
- ☐ forecasts
- ☐ freshwater
- ☐ geological sciences
- ☐ geophysics
- ☐ geopolitics
- ☐ glaciers
- ☐ global
- ☐ greenhouse gases
- ☐ history
- ☐ human & health sciences
- ☐ humanities
- ☐ ice sheets
- ☐ Indigenous Knowledge
- ☐ Indigenous Peoples
- ☐ industry
- ☐ infrastructure
- ☐ instrument development
- ☐ knowledge
- ☐ land
- ☐ languages
- ☐ law
- ☐ mapping
- ☐ marine
- ☐ mitigation
- ☐ modelling
- ☐ monitoring
- ☐ observation
- ☐ oceanography
- ☐ outreach
- ☐ permafrost
- ☐ policy
- ☐ pollution
- ☐ prediction
- ☐ remote sensing/GIS
- ☐ resilience
- ☐ resources
- ☐ satellites
- ☐ sea ice
- ☐ snow
- ☐ social sciences
- ☐ society
- ☐ space physics
- ☐ stakeholders
- ☐ standardize
- ☐ subsistence (activities)
- ☐ sustainability
- ☐ technology
- ☐ tourism
- ☐ vulnerability
- ☐ water security
- ☐ weather
- ☐ well-being
- ☐ wildlife
- ☐ Other:

19. Does the project include *(Choose all that apply)*:

- ☐ Natural sciences
- ☐ Social sciences
- ☐ Arts & Humanities
- ☐ Indigenous Knowledge
- ☐ Community-driven research/monitoring
- ☐ Education/Capacity Building
- ☐ Outreach

20. If this Deliverable/Project was submitted for ASM1, which theme does it most closely relate to? *(Choose one)*

- ☐ Identifying Arctic-Science Challenges and Their Regional and Global Implications
- ☐ Strengthening and Integrating Arctic Observations and Data Sharing
- ☐ Applying Expanded Scientific Understanding of the Arctic to Build Regional Resilience and to Shape Global Responses
- ☐ Empowering Citizens through Science Technology, Engineering, and Mathematics (STEM) Education Leveraging Arctic Science
- ☐ Not submitted to ASM1 / Do not know

21. As this Project/Deliverable was submitted as a contribution to support the goals of the ASM2 Joint Statement, which areas does it specifically address? *(Choose up to 3)*

- ☐ Theme 1: Strengthening, Integrating and Sustaining Arctic Observations, Facilitating Access to Arctic Data, and Sharing Arctic Research Infrastructure
  - ☐ Move from design to deployment phase of an integrated Arctic observing system
    - ☐ Sustained Arctic Observing Networks (SAON)
    - ☐ Copernicus
    - ☐ Svalbard Integrated Arctic Earth Observing System (SIOS)
    - ☐ Distributed Biological Observatory (DBO)
    - ☐ Other observing system:
  - ☐ Enhance cooperation among space agencies
  - ☐ Cooperate in facilitating international access to Arctic Research Infrastructure
  - ☐ Make Arctic research and monitoring datasets available, discoverable and relevant for communities
  - ☐ Explore new technologies for unmanned observing systems and remote sensing

- ☐ Theme 2: Understanding Regional and Global Dynamics of Arctic Change
  - ☐ Enhance international cooperation
    - ☐ Year of Polar Prediction (YOPP)
    - ☐ Multidisciplinary Drifting Observatory for the Study of Arctic Change (MOSAiC)
    - ☐ Increase predictive capabilities for Arctic weather and climate
    - ☐ Improve confidence in predications for future Arctic changes
  - ☐ Promote voluntary international cooperation
    - ☐ Predicting sea-ice changes
    - ☐ Understanding the impact of changes on freshwater, terrestrial and marine ecosystems
    - ☐ Assessing the stability of permafrost
    - ☑ Better predicting the dynamics of ice sheets, glaciers and ice caps and their ocean connections
    - ☐ Understanding social and economic drivers of Arctic change

- ☐ Theme 3: Assessing Vulnerability and Building Resilience of Arctic Environments and Societies
  - ☐ Enhance multilateral scientific cooperation between Arctic and non-Arctic States, Indigenous Peoples, local communities, and societal and economic stakeholders
    - ☐ Identifying risks and minimizing the impacts of climate and global changes on the Arctic
    - ☐ Developing adaptation and resilience-building strategies
    - ☐ Developing activities that address the sustainability of new Arctic opportunities
  - ☐ Develop and integrate in the Arctic region services making use of climate information
  - ☐ Develop and disseminate best practices for coping with impacts of Arctic change
  - ☐ Develop research and educational programs to support Indigenous languages, cultural and economic practices, sustainable ways of living, and heritage resource preservation

22. In addition to the specific scientific topics mentioned in the ASM2 Joint Statement (identified in the question above), several additional points were agreed to as important. Does this project relate to any of these points identified in the statement? If so, please check the relevant points and include a summary of what was done in the project to address the point(s) in less than 250 words in the space below:

    - ☐ Striving for diversity - also of gender - and inclusiveness in Arctic science, recognizing that cultivating talent and promoting excellence across the social spectrum will lead to better problem solving and innovative solutions to Arctic scientific challenges
    - ☐ Acknowledging that, where appropriate, research in the Arctic has to be carried out - in compliance with national and sovereignties and jurisdictions - respecting the values, interests, priorities, culture and traditions of Arctic Indigenous Peoples and local communities
    - ☐ Including Indigenous Peoples in the assessment and definition of Arctic research priorities
    - ☐ Involving local communities

    Progress made (1500 character limit):

23. Is this Deliverable/Project also being submitted toward the goals of ASM3? If so, which theme[1] does it most closely relate. *(Choose one)*

    - ☐ Theme 1: Observe
      Observing networks, Data sharing – towards implementation
    - ☐ Theme 2: Understand
      Enhance understanding and prediction capability on Arctic environmental and social systems and its global impact.
    - ☐ Theme 3: Respond
      Sustainable development, Evaluation of vulnerability and resiliency, Application of knowledge
    - ☐ Theme 4: Strengthen
      Capacity building, Education, Networking, Resilience – prepare future generations

24. Was this project/deliverable created specifically for / or as direct result of Arctic Science Ministerial Meetings?
    - ☐ Yes
    - ☐ No

[1] Draft themes as of 10 April. The specific wording of subtitles may change but the overall concepts of Observe, Understand, Respond and Strengthen will remain.
