7. Description of the project (3000 characters limit)

   Development for and of the Arctic build on sound understanding of the Arctic, its people, nature, climate etc. The over 180 UArctic members daily train and education experts and researchers in and for the north. This project enables easy access to the best knowledge on the Arctic:
   • The UArctic study catalogue, institution profile, and research infrastructure catalogue provide a one stop shop, where prospective learners on all levels can find all relevant courses and study programs about the Arctic.
   • The Arctic University of Norway, University of Alberta and UArctic is developing four mini MOOC's about the Arctic freely accessible on the Coursera platform. This provide a high quality, basic introduction to the Arctic available to all.
