ASM2 Project Deliverable Update

Submitting Country/Organization Norway

1. Project Title (150 character limit)

   CAATEX - Coordinated Arctic Acoustic Thermometry Experiment

2. Funding Program(s) and/or Organization(s)

   CAATEX is funded by Research Council of Norway and and the US Office of Naval Research.

3. Coordinating organization(s)

   NERSC and Scripps Institution of Oceanographic Institution

4. Name of main contact person

   Hanne Sagen and Mathew Dzieciuch

5. Contact email address

6. Summary of Project/Project Goal (300 character limit)

   The CAATEX project will use basin-wide acoustic thermometry and local ice-ocean observations in combination with an eddy-resolving ice-ocean model to produce improved ocean state estimates to estimate the Arctic Ocean heat content and to benchmark global climate models.

7. Description of the project (3000 characters limit)

   The role of the Arctic Ocean heat content is increasingly important with the rapid decline of the Arctic sea ice. Underneath the very fresh surface layer, large amounts of heat are stored, and if available to the sea ice it could melt all sea ice in the Arctic within a few years. Signs of structural changes in the ocean have been observed in the eastern Eurasian Arctic. It is therefore of utmost interest to estimate the current heat content of the Arctic Ocean. In terms of observations, it is very difficult to observe the deep Arctic Ocean synoptically. Present methods such as ice-tethered platforms (ITP) cover very limited regions and require stable ice-floes for deployment. Data from ITPs contain combined spatial and temporal information, making it difficult to interpret for climate change detection. Bottom-anchored moorings have also very limited coverage, but provide yearlong time series at fixed positions. Our approach is to use basin-wide acoustic thermometry and local ice-ocean observations in combination with an eddy-resolving ice-ocean model to produce improved ocean state estimates. This can be used to estimate the Arctic Ocean heat content and to benchmark global climate models.

   The CAATEX observational program will be implemented in collaboration with US partners (SIO and WHOI) using Norwegian and US icebreakers to deploy moorings with instruments. Fixed moorings in a relay across the Arctic Basin with acoustic transceivers will

    More than 50
    Unknown

11. What is the diversity of project personnel/staff (E.g. gender, career stage, Indigenous representation) (1500 character limit):

12. Stage of Project Development

Proposed
Early Planning
On Going
Final Stages
Finished

13. Next steps for the project if in the proposed, early planning or ongoing stages (1500 character limit):

14. Major progress/developments since ASM2 (1500 character limit):

15. Are there opportunities for new collaborators to join? If so, please describe them. (1500 character limit)

16. Collaborating Countries/Governments *(Choose all that apply)*

- ☐ Austria
- ☐ Belgium
- ☐ Canada
- ☐ China
- ☐ Czech Republic
- ☐ Denmark
- ☐ Faroe Islands
- ☐ Finland
- ☐ France
- ☐ Germany
- ☐ Greenland
- ☐ Iceland
- ☐ India
- ☐ Italy
- ☐ Japan
- ☐ Netherlands
- ■ Norway
- ☐ Poland
- ☐ Portugal
- ☐ Republic of Korea
- ☐ Russia
- ☐ Singapore
- ☐ Spain
- ☐ Sweden
- ☐ Switzerland
- ☐ UK
- ■ USA
- ☐ EU
- ☐ Other(s):

17. Location of Project *(Choose all that apply)*

- ☐ Global
- ☐ Polar in General
- ☐ Arctic in General
- ☐ Sub-Arctic in General
- ☐ Alaska in General
- ☐ Alaskan Arctic
- ☐ Canadian Arctic in General
- ☐ Yukon
- ☐ Northwest Territories
- ☐ Nunavut
- ☐ Nunavik
- ☐ Labrador
- ☐ Greenland
- ☐ Iceland in General
- ☐ Icelandic Arctic
- ☐ Faroe Islands
- ☐ Norway in General
- ☐ Norwegian Arctic
- ☐ Svalbard
- ☐ Sweden in General
- ☐ Swedish Arctic
- ☐ Finland in General
- ☐ Finish Arctic
- ☐ Russian Arctic in General
- ☐ Eastern Siberia
- ☐ Western Siberia
- ☐ Arctic Ocean in General
- ☐ Central Arctic Ocean
- ☐ Bering Sea
- ☐ Chukchi Sea
- ☐ Beaufort Sea
- ☐ Hudson Bay
- ☐ Labrador Sea
- ☐ Davis Strait
- ☐ Baffin Bay
- ☐ Denmark Strait
- ☐ Norwegian Sea
- ☐ Greenland Sea
- ☐ Barents Sea
- ☐ Kara Sea
- ☐ Laptev Sea
- ☐ East Siberian Sea
- ☐ Sea of Okhotsk
- ☐ North Pacific Ocean
- ☐ North Atlantic Ocean
- ☐ No Geographic Orientation
- ☐ Other Regions

18. Keywords describing the Deliverable/Project *(Choose all that apply)*

- ☐ adaptation
- ☐ art
- ☐ atmosphere
- ☐ atmospheric sciences
- ☐ biodiversity
- ☐ biology
- ☐ capacity building
- ☐ carbon
- ☐ change
- ☐ climate
- ☐ collaboration
- ☐ communication
- ☐ community
- ☐ community driven
- ☐ coordination
- ☐ cryosphere
- ☐ culture
- ☐ data management

- ☐ well-being
- ☐ wildlife
- ☐ Other:

19. Does the project include *(Choose all that apply)*:

- ☐ Natural sciences
- ☐ Social sciences
- ☐ Arts & Humanities
- ☐ Indigenous Knowledge
- ☐ Community-driven research/monitoring
- ☐ Education/Capacity Building
- ☐ Outreach

20. If this Deliverable/Project was submitted for ASM1, which theme does it most closely relate to? *(Choose one)*

- ☐ Identifying Arctic-Science Challenges and Their Regional and Global Implications
- ☐ Strengthening and Integrating Arctic Observations and Data Sharing
- ☐ Applying Expanded Scientific Understanding of the Arctic to Build Regional Resilience and to Shape Global Responses
- ☐ Empowering Citizens through Science Technology, Engineering, and Mathematics (STEM) Education Leveraging Arctic Science
- ☐ Not submitted to ASM1 / Do not know

21. As this Project/Deliverable was submitted as a contribution to support the goals of the ASM2 Joint Statement, which areas does it specifically address? *(Choose up to 3)*

- ☐ Theme 1: Strengthening, Integrating and Sustaining Arctic Observations, Facilitating Access to Arctic Data, and Sharing Arctic Research Infrastructure
  - ☐ Move from design to deployment phase of an integrated Arctic observing system
    - ☐ Sustained Arctic Observing Networks (SAON)
    - ☐ Copernicus
    - ☐ Svalbard Integrated Arctic Earth Observing System (SIOS)
    - ☐ Distributed Biological Observatory (DBO)
    - ☐ Other observing system:
  - ☐ Enhance cooperation among space agencies
  - ☐ Cooperate in facilitating international access to Arctic Research Infrastructure
  - ☐ Make Arctic research and monitoring datasets available, discoverable and relevant for communities
  - ☐ Explore new technologies for unmanned observing systems and remote sensing

- ☐ Theme 2: Understanding Regional and Global Dynamics of Arctic Change
  - ☐ Enhance international cooperation
    - ☐ Year of Polar Prediction (YOPP)
    - ☐ Multidisciplinary Drifting Observatory for the Study of Arctic Change (MOSAiC)
    - ☐ Increase predictive capabilities for Arctic weather and climate
    - ☐ Improve confidence in predications for future Arctic changes
  - ☐ Promote voluntary international cooperation
    - ☐ Predicting sea-ice changes
    - ■ Understanding the impact of changes on freshwater, terrestrial and marine ecosystems
    - ☐ Assessing the stability of permafrost
    - ☐ Better predicting the dynamics of ice sheets, glaciers and ice caps and their ocean connections
    - ☐ Understanding social and economic drivers of Arctic change

- ☐ Theme 3: Assessing Vulnerability and Building Resilience of Arctic Environments and Societies
  - ☐ Enhance multilateral scientific cooperation between Arctic and non-Arctic States, Indigenous Peoples, local communities, and societal and economic stakeholders
    - ☐ Identifying risks and minimizing the impacts of climate and global changes on the Arctic
    - ☐ Developing adaptation and resilience-building strategies
    - ☐ Developing activities that address the sustainability of new Arctic opportunities
  - ☐ Develop and integrate in the Arctic region services making use of climate information
  - ☐ Develop and disseminate best practices for coping with impacts of Arctic change
  - ☐ Develop research and educational programs to support Indigenous languages, cultural and economic practices, sustainable ways of living, and heritage resource preservation

22. In addition to the specific scientific topics mentioned in the ASM2 Joint Statement (identified in the question above), several additional points were agreed to as important. Does this project relate to any of these points identified in the statement? If so, please check the relevant points and include a summary of what was done in the project to address the point(s) in less than 250 words in the space below:

    - ☐ Striving for diversity - also of gender - and inclusiveness in Arctic science, recognizing that cultivating talent and promoting excellence across the social spectrum will lead to better problem solving and innovative solutions to Arctic scientific challenges
    - ☐ Acknowledging that, where appropriate, research in the Arctic has to be carried out - in compliance with national and sovereignties and jurisdictions - respecting the values, interests, priorities, culture and traditions of Arctic Indigenous Peoples and local communities
    - ☐ Including Indigenous Peoples in the assessment and definition of Arctic research priorities
    - ☐ Involving local communities

    Progress made (1500 character limit):

23. Is this Deliverable/Project also being submitted toward the goals of ASM3? If so, which theme[1] does it most closely relate. *(Choose one)*

    - ☐ Theme 1: Observe
      Observing networks, Data sharing – towards implementation
    - ☐ Theme 2: Understand
      Enhance understanding and prediction capability on Arctic environmental and social systems and its global impact.
    - ☐ Theme 3: Respond
      Sustainable development, Evaluation of vulnerability and resiliency, Application of knowledge
    - ☐ Theme 4: Strengthen
      Capacity building, Education, Networking, Resilience – prepare future generations

24. Was this project/deliverable created specifically for / or as direct result of Arctic Science Ministerial Meetings?
    - ☐ Yes
    - ☐ No

[1] Draft themes as of 10 April. The specific wording of subtitles may change but the overall concepts of Observe, Understand, Respond and Strengthen will remain.
