7. Description of the project (3000 characters limit)

   Portuguese and Spanish research on Arctic issues has been framed within two national Polar research programmes: the Portuguese Polar Program within the Fundação para a Ciência e a Tecnologia, I. P. (Ministério da Ciência, Tecnologia e Ensino Superior da República Portuguesa), and the Comité Polar Español (CPE) within the Agencia Estatal de Investigación (Ministerio de Economia, Industria y Competitividad). The two countries formally collaborate on Polar research and logistics for over a decade, mainly in Antarctica, under the Polar Science Cooperation Agreement signed in 2009 by the Ministério da Ciência, Tecnologia e Ensino Superior da República Portuguesa and Ministério de Ciência e Innovación del Reino de España. The collaboration between Iberian scientists and R&D institutions has also been frequent in the Arctic, with several joint projects.
   At the 2nd Arctic Ministerial, Portugal and Spain propose to join efforts in promoting scientific cooperation to contribute to the international effort to tackle the three key thematic challenges for the Arctic. The joint activities will be framed within the new cross-cutting program of the International Arctic Science Committee “Terrestrial – Multidisciplinary distributed Observatories for the Study of Arctic Climate” (T-MOSAiC), which will have its international secretariat hosted at the University of Lisbon. The countries will foster new bilateral research projects in the Arctic, with focus in the fast changing Canadian Arctic and sub-Arctic, especially targeting
