

Take N' Make Mosaics

Set out your glass pieces and glue.
Optional: Paint brush for glue.
We recommend just using your finger.

Glue your pieces on to the base. Use a thin layer of glue to attach glass. Glue should not collect in between glass pieces.

After all pieces are glued, let sit over night for the glue to completely dry.

Once you have mixed the grout to a stiff peanut butter consistency, spread it around your mosaic to fill the spaces between the glass.

Let the grout set for 15-20 minutes. This will cause the grout to be a chalk consistency when you need to wipe it off.

Wipe the grout off the glass. Avoid rubbing too hard and removing grout from between the glass.

After the grout is cleaned, leave to completely set over night.
Optional: paint the sides with an acrylic paint.
