## SUPERIOR SCRAPER

### SKID STEER MOUNT

## AN EASY, AUTOMATICALLY ADJUSTABLE MANURE SCRAPER

- Floating linkage prevents excessive down pressure
- Improved skid steer traction
- Reduces uneven wear of scraper wings
- Self adjusting wings ensure consistent curb contact & pressure, ensuring effective manure removal
- Operated with boom down to increase operator visibility
- Independent wing movement
- Automatically adjusts to variable width alleyways
- Open and close wings with skid steer auxiliary hydraulics
- Operating width 6 ft to 14 ft

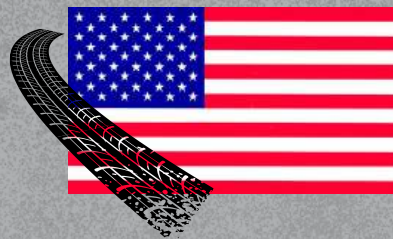

Floating linkage prevents excessive down pressure

Reduces labor and increases efficiency

Operated with boom down to increase operator's visibility

Durable, adjustable high-tensile rubber ensures long service life. USA made.

### **COMPACT DESIGN**

FOLDS FOR EASY MANEUVERABILITY  
AND BACK SCRAPING

### **CONSTANT OUTWARD PRESSURE**

WITH LOW PSI RELIEF KEEPS WINGS  
AGAINST CURBS.

### **3 SUPERIOR SCRAPER SIZES**

S610 - 10FT OPEN | 6FT CLOSED  
S712 - 12FT OPEN | 7FT CLOSED  
S814 - 14FT OPEN | 8FT CLOSED

# SUPERIOR SCRAPER

3-POINT MOUNT

## AN EASY, AUTOMATICALLY ADJUSTABLE MANURE SCRAPER

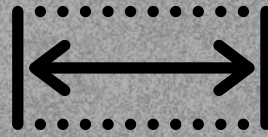

- Reduces labor and increases efficiency
- Built for rugged farm use
- Two hydraulic options. Hard plumb electric valve for easy operation by switches or run off rear remotes with optional accumulator
- Flat back design allows closer proximity to gates and end walls
- Automatic hydraulic float with variable outward pressure on curbs
- Automatically adjusts to variable width alleys
- Electric controls allow for cylinders to have a low PSI relief to protect the cylinders and the three point arms of the tractor
- Open width of 14ft and closed width of 8ft
- Speeds up a labor intensive job

Built for rugged farm use

Open width of 14 feet

Speeds up a labor  
intensive job

Rear 3-point scraper clears away  
from walls and gates, eliminating the  
need for turning around

### **FLAT BACK**

ALLOWS CLOSER PROXIMITY TO GATES  
AND END WALLS

### **ONE PASS CLEANING**

HYDRAULICS GIVE CONSTANT OUTWARD  
PRESSURE ON CURBS, EVEN IF THE  
OPERATOR DRIFTS OFF CENTER

### **3 POINT MOUNT**

GREATER STABILITY AND TRACTION,  
QUICK AND EASY IMPLEMENT CHANGES,  
AND BETTER OVERALL CONTROL.

# SUPERIOR SCRAPER

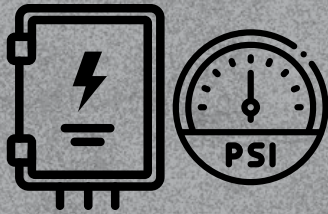

## TRACTOR MOUNT

### AN EASY, AUTOMATICALLY ADJUSTABLE MANURE SCRAPER

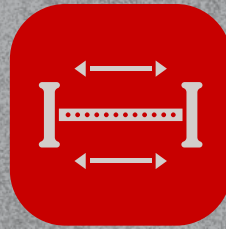

- Reduces labor and increases efficiency
- Built for rugged farm use
- Two hydraulic options. Hard plumb electric valve for easy operation by switches or run off rear remotes with optional accumulator
- Automatic hydraulic float with variable outward pressure on curbs
- Automatically adjusts to variable width alleys
- Attach any skid steer size scraper to the front of your compact tractor
- Speeds up a labor intensive job
- Electric controls allow for cylinders to have a low PSI relief for protection
- Operating width 6 ft to 14 ft
- Rigid frame pushes on drawbar of tractor

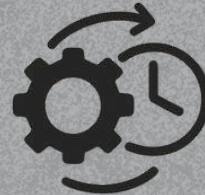

Electrical controls reduce PSI relief in cylinders, enhancing performance and protection

Automatically adjusts to variable width alleys

Built for rugged farm use

Reduces labor and increases efficiency

## CONNECTION

ATTACH OUR SKID STEER SCRAPER TO THE FRONT OF YOUR COMPACT TRACTOR

## SIZE OPTIONS

S610 - 10FT OPEN	6FT CLOSED
S712 - 12FT OPEN	7FT CLOSED
S814 - 14FT OPEN	8FT CLOSED

## WINGS

OPEN AND CLOSE WINGS WITH A FLIP OF A SWITCH

## FEED PUSHER

### SKID STEER MOUNT

- Floating linkage prevents excessive down pressure to feed pusher, providing improved traction and reduces excessive wear on the rubber edge
- Operated with boom down to increase operator's visibility
- Adjustable and reversible rubber edge for extended life
- V-style allows for pushing in either direction
- Made in the USA with 100% USA made high-tensile adjustable rubber

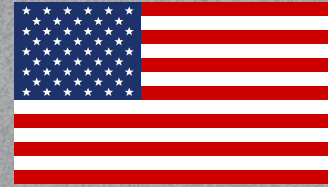

Clear Visibility

Floating linkage  
improves traction

Push in either direction

MADE IN USA

CLEAR VISIBILITY

PUSH IN EITHER  
DIRECTION

ADJUSTABLE AND  
REVERSIBLE RUBBER

# BEDDING EXTRACTOR

## SKID STEER MOUNT

- Two passes with the extractor will cleanly remove up to 10" of bedding
- Powers bedding into the aisle for easy cleanup
- Effective way to remove bedding with high bacterial count from the rear of the stall
- Carbide mounted teeth remove the toughest bedding
- Speeds up a labor-intensive job
- Raises to a vertical position for transport
- Curb indicator
- Equipped with its own parking stand
- Quickly connects to a skid steer universal mounting plate.

Vertical positioning  
for transport

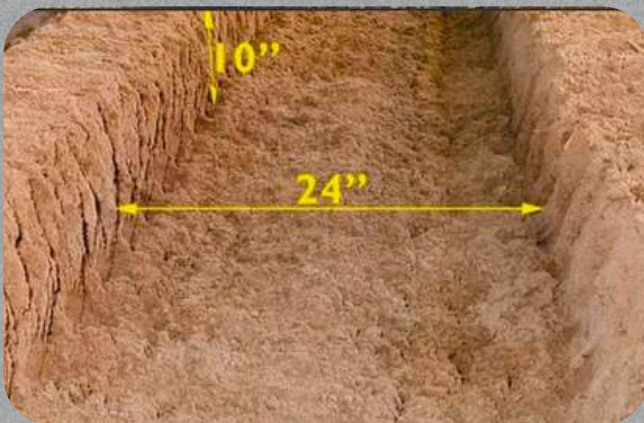

No more back  
breaking shoveling

2 passes cleanly remove  
up to 10" of bedding

Makes quick work of  
removing soiled bedding

FINISHED TRENCH

AUGER SCRAPER

CURB GUIDE

CARBIDE TIPPED AUGER

# MAT MATE

## SKID STEER MOUNT

- Mat Mate powers off organic material at a rate that normal scraping cannot match
- Better removal of organic material means mats will dry quicker
- Drier and cleaner mats lower bacterial growth
- Skid Steer Universal mounting plate
- One set of hydraulic couplers runs Mat-Mate's rotary brush and operates the boom
- Optional sprayer attachments applies disinfectant to the brushed areas

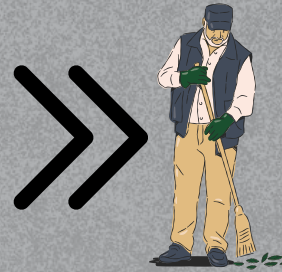

Powers off organic material at a rate unmatched by normal scraping

Optional sprayer lowers SCC

Compact design makes it easy to maneuver in tight areas

MORE effective than hand brushing

RAISED BOOM

OPTIONAL SPRAYER

BRUSHING

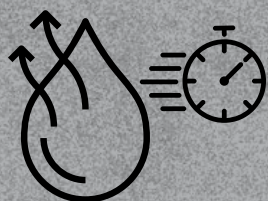

# MAT MATE

## SIDE MOUNT

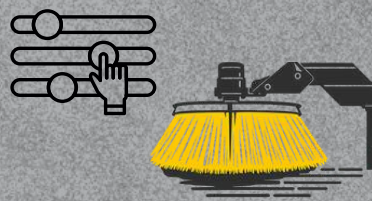

- Brushing area is clearly visible from the tractor seat, allowing the operator to clean stalls with ease
- Rotary brush is driven by a high torque low RPM motor
- Operator adjusts the amount the brush contacts the bed
- All functions are controlled by the fender mounted toggle switch control box
- Mat Mate powers off organic material at a rate that normal scraping cannot match
- Better removal of organic material means mats will dry quicker
- Drier and cleaner mats lower bacterial growth
- Optional sprayer attachments applies disinfectant to the brushed areas

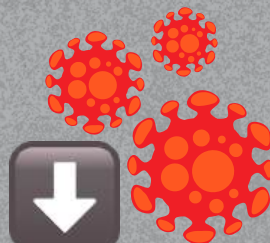

Better removal means  
stalls dry quicker

Operator adjusts the amount of  
contact between the brush and bed

High visibility for the operator  
from the tractor seat

Drier & cleaner mats  
lower bacterial growth

TRACTOR FENDER MOUNT  
ELECTRONIC CONTROLS

ROTARY BRUSH ADJUSTMENT

CLEAN MATTRESS

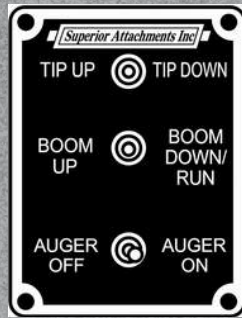

## LIME DISPENSER

### 3 POINT MOUNT

- Category 1 hitch that is compatible with standard compact and utility tractors
- 0.75 cubic yard capacity for efficient operation
- Hydraulic cylinder allows bucket to scoop materials from bulk piles
- Built-in breakaway shear bolt on boom arm provides overload and obstruction protection
- Separate adjustable-flow augers to customize discharge
- Agitators to prevent bridging in bucket and ensures smooth flow
- Roll up tarp for protection and safety
- Electric controls for simple operation
- 24" dispensing wide area for a consistent spread
- Open-end auger allows discharge of small stones or coarse material

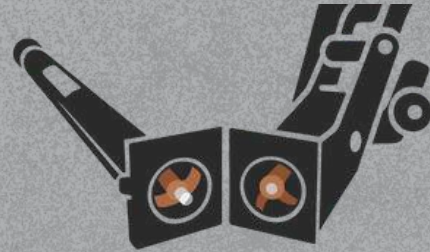

Simple Operational Controls

Tarp covered dispenser to prevent contamination and promote safety

Lime increases the bedding PH, reducing the risk of Mastitis

Separate adjustable-flow augers with an open end for discharging coarse material

HYDRAULIC TIPPING  
EASILY SCOOPS LIME

AGITATORS PROMOTE  
SMOOTH FLOW

REAR MOUNT ON TRACTOR

24" SPREAD WIDTH

# SANDMAN

## SKID STEER MOUNT

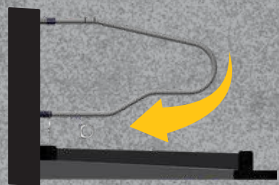

**SANDMAN LP** (Low Profile) – Designed for versatility across different stall layouts

### BEYOND SAND. BUILT FOR BEDDING.

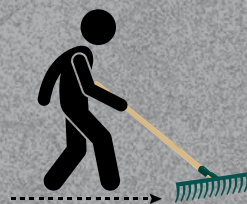

- Designed to aerate, slope and groom free stall beds in one step
- Sloping the bed improves cow comfort
- Sloping promotes proper cow placement within the stall keeping manure in the aisle
- Aeration dries bedding and reduces bacterial growth
- Speeds up a labor-intensive job and lowers costs
- Raises to a vertical position for transport
- Boom and rotary arm are hydraulically driven
- Rotary motor starts once boom is lowered
- Compact design and hydraulically raised boom makes it easy to maneuver in tight areas

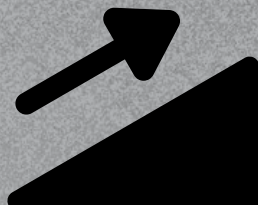

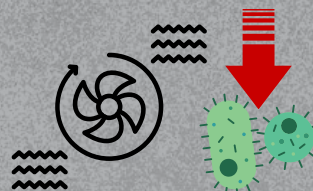

Sandman works under the stall loops

Rakes at a walking pace for quick prep of the stall beds

Grooms to an uphill slope that cows prefer to lay on

Aeration dries bedding and reduces bacterial growth

## **CURB SCRAPER**

SCRAPES THE TOP OF THE CURB  
BRINGING BEDDING BACK INTO THE STALL

## **ROTARY ARM**

BOLTED ON, REPLACEABLE SHOVELS

## **SLOPED AND AERATED**

IMPROVES COW COMFORT AND DRIES  
BEDDING TO LOWER SCC AND MASTITIS

# SANDMAN

## SIDE MOUNT

**SANDMAN LP** (Low Profile) – Designed for versatility across different stall layouts

## BEYOND SAND. BUILT FOR BEDDING.

- 8 inches of vertical travel
- Designed to aerate, slope and groom free stall beds in one step
- Sloping promotes proper cow placement within the stall keeping manure in the aisle and improving cow comfort
- Compact design and hydraulically raised boom makes it easy to maneuver in tight areas
- Aeration dries bedding to lower SCC and Mastitis
- Speeds up a labor intensive job and lowers costs
- Raises to a vertical position for transport
- Boom and rotary arm are hydraulically driven
- Rotary motor starts once boom is lowered

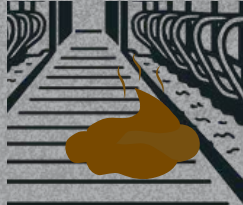

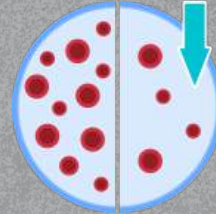

Slopes beds to improve  
cow comfort

8" of vertical travel

Encourages proper cow placement  
to keep manure in the aisle

Lower Somatic cell count

### **LOW PROFILE GEARBOX**

HEAVY DUTY GEARBOX ALLOWS CLEARANCE  
UNDER LOWER STALL LOOPS

### **CURB SCRAPER**

SCRAPES THE TOP OF THE CURB BRINGING  
BEDDING BACK INTO THE STALL

### **RAISED BOOM**

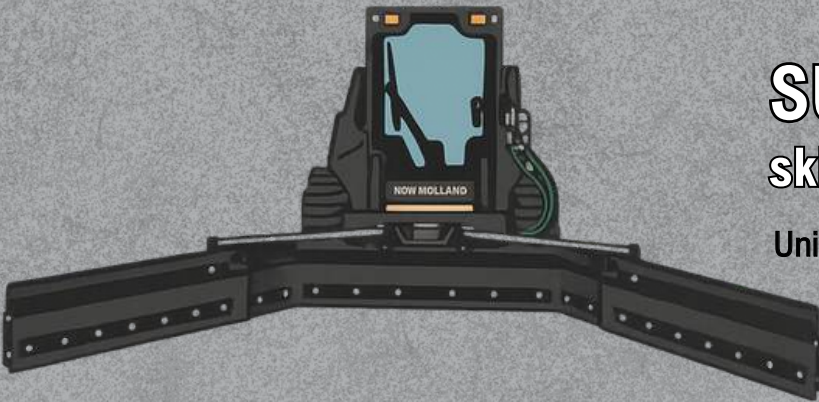

ELECTRIC OVER HYDRAULIC CONTROLS  
RAISE THE BOOM FOR MANEUVERABILITY

# SUPERIOR SCRAPER

## skid steer

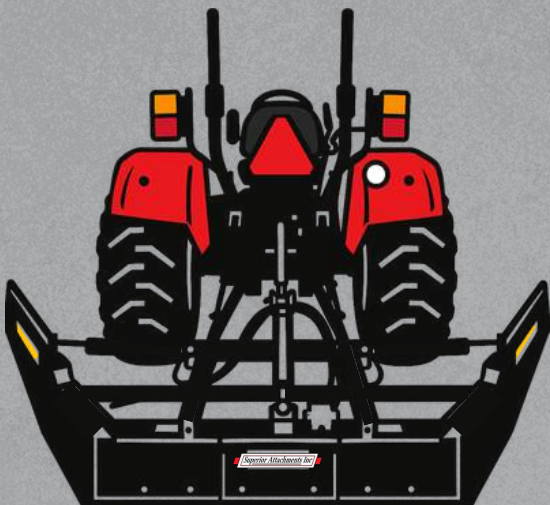

Universal adapter plate with floating linkage

Specs	S814	S712	S610
Open width	14 ft	12 ft	10 ft
Closed width	8 ft	7 ft	6 ft
Hydraulic Connection	Flat face couplers; male tip pressure relieved for ease of connection		
Hydraulic Requirements	Single set of remotes	Single set of remotes	Single set of remotes
Weight	1,032 lbs	970 lbs	908 lbs
Height	22 inches	22 inches	22 inches
Scraping Edge	High Tensile Rubber, adjustable and reversible made in the USA		

# SUPERIOR SCRAPER

3 Point & tractor mounts

Specs	S814
Open width	14 ft
Closed width	8 ft
Hydraulic Connection	Quick disconnect couplers. Plumbed Electric hydraulic valves
Hydraulic Requirements	Ties into hydraulic plumbing on tractor
Weight	1,032 lbs
Height	22 inches
Scraping Edge	High Tensile Rubber, adjustable and reversible made in the USA

# FEED PUSHER

## Specs

## FPV8

Open width	8 ft 4 in
Closed width	8 ft
Hydraulic Requirements	N/A
Weight	698 lbs
Height	23 inches
Scraping Edge	High Tensile Rubber, adjustable & reversible made in the USA

## Specs

## Bedding Extractor

Cutting Width	24 inches
Cutting Depth	1 - 10 inches
Auger Diameter	24" x 18" tapered for stall clearance
Auger flighting scraper	Spring activated
Auger flight thickness	3/8 inch
Number of carbide tips	22
Rotary Auger Drive	Direct Drive Hydraulic Motor
Hydraulic requirements	Single set of remotes, 8 gpm
Skid Steer mount	Universal adapter plate
Auger Speed	Prest flow controlled
Auger torque	Pressure relieved at preset torque
Weight	830 lbs
Hydraulic couplers	Flat face couplers; male tip pressure relieved for ease of connection

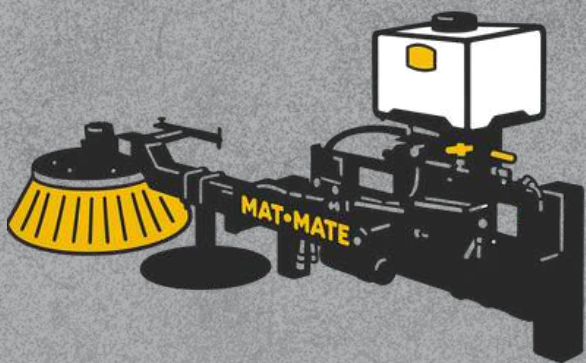

# BEDDING EXTRACTOR

# MAT MATE

## skid steer and side mount

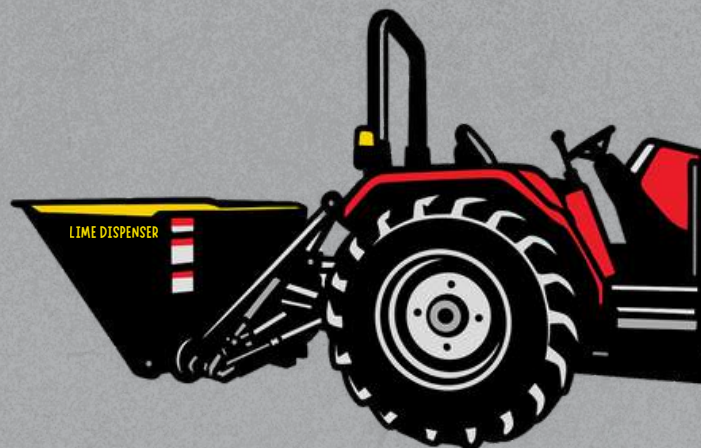

Specs	Skid Steer & Side mount
Brush Diameter	36 inches
Rotary Brush Drive	Direct Drive Hydraulic Motor
Hydraulic Requirements	Single set of remotes, 7 gpm
Attachment of machine	Skid Steer universal adapter plate
Rotary Brush Speed	Preset flow controlled
Rotary brush torque	Pressure relieved at preset torque
Weight	675 pounds (skid)
Hydraulic Couplers	Flat face couplers; male top pressure relieved for ease of connection (skid)

## Specs Tractor Mount

Attachment of Machine	Category 1 hitch
Capacity	0.75 cubic yards
Scooping Function	Hydraulic tip for scooping into piles
Boom Arm	Hydraulic with breakaway shear bolt
Augers	Separate, adjustable flow
Controls	Electric operation
Dispensing Width	24 inches
Stone Discharge	Open auger for small stones

# LIME DISPENSER

We are proud to provide dairymen with time proven and dependable management tools.

Finding the correct bedding management tools for your herd can be challenging.

Superior Attachments free stall bedding management tools are here to help. Engineered for consistency, our tools deliver reliable performance in sand, sawdust, compost, fiber, and digester solids bedding materials. The Sandman and Bedding Extractor are designed to help you with cow comfort and free stall bedding management.
