Canada Greener Homes Grant

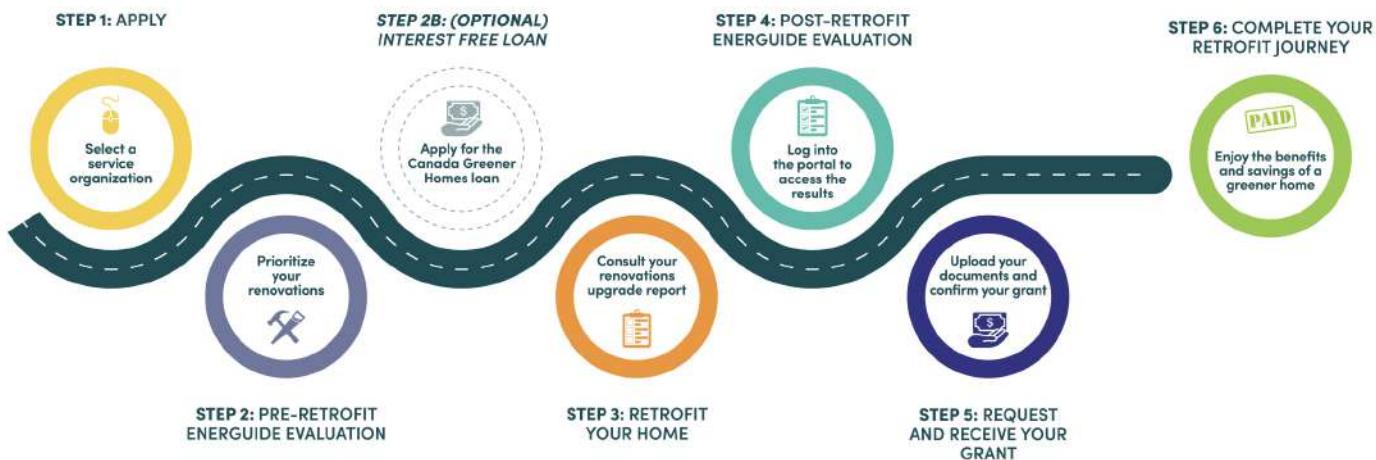

Helping you **save** energy and make your home more comfortable

HOW THE GRANT PROCESS WORKS

The Canada Greener Homes Initiative provides grants and a loan for EnerGuide evaluations and for retrofits. It is important that you read all eligibility criteria and grant requirements to be sure that you will qualify for the grant at the end of the process.

You must complete a pre-retrofit EnerGuide evaluation before beginning the retrofits to be eligible for the grant.

All models are eligible for the Canada Greener Homes Grant

THE HOMEOWNER JOURNEY

- Select a service organization
- Pre-retrofit EnerGuide evaluation
- (optional) Interest-free loan — Canada Greener Homes Loan
- Retrofit your home - Consult the renovation upgrade report
- Post-retrofit **EnerGuide** evaluation
- Request and receive your grant
- Complete your retrofit journey

Enjoy the benefits and savings of a greener home!

Standard Features

- Up to 18.4 SEER2
- Available in 1.5-5 ton models
- Superior low ambient heat output: 100% output down to -20°C (-4°F) with COP up to 2.0, continuous operation as cold as -30°C (-22°F) (1)
- User customizable set point for heat pump to auxiliary heat change over temperatures
- Reduced replacement installation cost by using existing refrigerant lines and control wiring (2)
- Advanced inverter control
- Intelligent diagnostics and adaptive control system

(1) Model dependent

(2) Refer to the installation manual for details on compatibility requirements

- Multi position (up/down/left/right)
- ECM up to 0.8 in. wc; stand pressure up to 1.0 in. wc
- Compatible with both 24V and 485 communication modes
- Aluminum evaporator coil
- Optional auxiliary heat kit up to 25kW
- Quiet Operation – inverter system running at significantly lower dB level

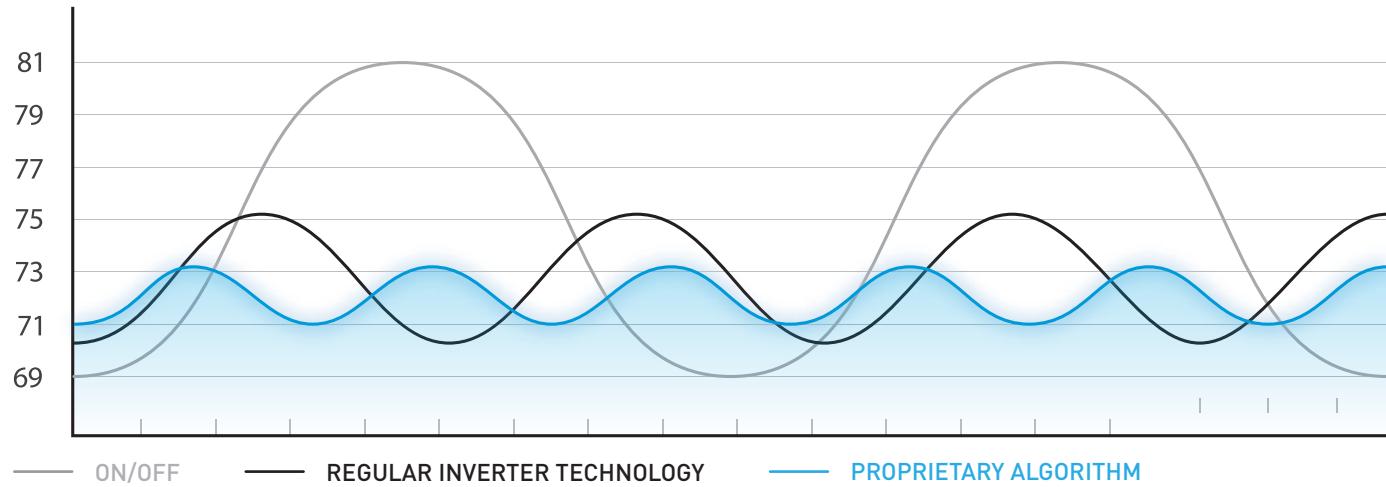

Core Features

Panasonic Inverter Heat Pump

ADVANCED INVERTER CONTROL

Minimal Indoor Temperature Fluctuation

Set Temperature: 22°C (72°F)

Proprietary algorithms enable a more precise analysis of indoor temperature variations and an optimization of the compressor in advance to reduce the temperature fluctuation. This means that compared to standard inverter technology, this advanced inverter technology provides more accurate temperature control, providing a consistent, and comfortable environment.

FLASH
COOLING/HEATING

ULTRA STABLE ROOM
COMFORT

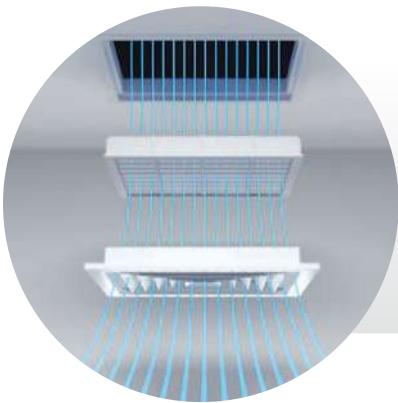

LOWER
OPERATING COST

Core Features

Panasonic Air Handling Unit

COMPUTATIONAL CONSTANT AIRFLOW

Computational Constant Airflow with an advanced algorithm automatically measures static pressure issues caused by blocked coils, dirty filters, kinks in ducts, etc. The ECM motor reacts to these conditions, adjusting the output power and fan speeds to ensure optimized airflow.

CONSTANT AIRFLOW

The Panasonic air handler is capable of ensuring optimal airflow even when the air passes through a high-density MERV13 filter.

CONVENIENT INSTALLATION

Constant CFM can adapt to the existing ductwork design, this enables the installer to be free from complicated manual air balance testing.

OPTIMAL COMFORT

Constant CFM can adapt to the pressure changes inside the ductwork as the system operates, guaranteeing constant and optimal airflow moving through the system.

HIGHER EFFICIENCY

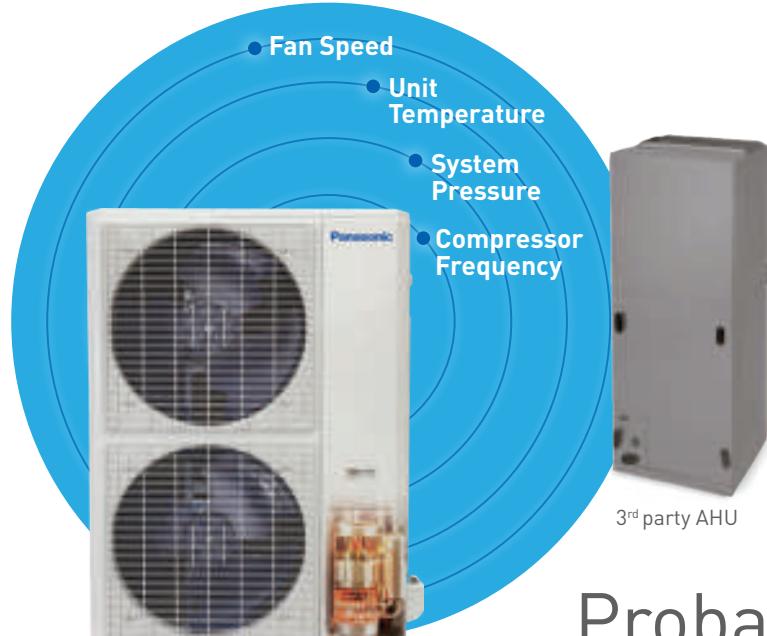

By delivering the right amount of airflow the system can effectively reduce energy waste due to excess airflow.

Exclusive BI-COMM Technology

Compatible with 485 & 24V

COMMUNICATION MODE

The Panasonic heat pump unit is able to precisely receive and process signals from the communicating air handler to manage the air temperature and airflow inside a home and maintain them at the most comfortable level.

SELF-ADAPT MODE

The Panasonic inverter heat pump has the ability to analyze the temperature and pressure change of the unit to adjust system operation. When matching the heat pump to existing equipment, even non-communicating, the system can function effectively as a communicating inverter combination so that homeowners can enjoy the benefits of inverter technology.

Probably the Most Flexible Heating Upgrade Solution Ever

The Panasonic system can flexibly mix and match with most other brand indoor units, outdoor units, and thermostats, even without changing electrical wiring or refrigerant lines.

Real Inverter Benefits For All

Inverter Heat Pump Condenser

UP TO 30% ENERGY SAVING

High efficiency Inverter compressor that ensures both energy saving & comfort.

QUIET OPERATION

As low as 59 dBA with a 1.5 ton inverter heat pump.

FAST HEATING AND COOLING

Faster comfort with our advanced compressor activation technology.

Enjoy Optimal Comfort

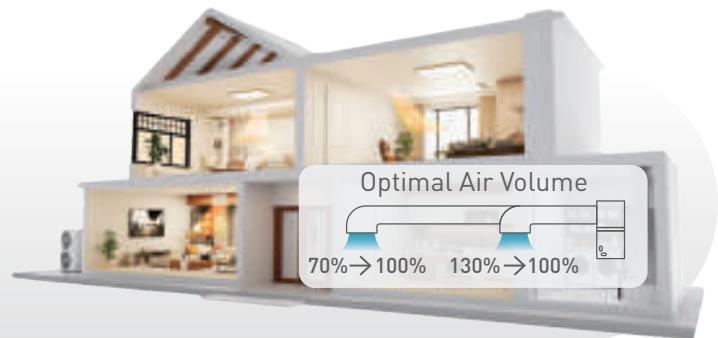

with the full system set

ULTRA STABLE ROOM TEMPERATURE

OPTIMAL AIRFLOW DELIVERY

Computational Constant Airflow.

Adaptable Heating Combination

Combo heat

Auxiliary heat kits available to offer the best heating combination and balance between rapid heating and energy-savings.

Quiet Operation

Inverter technology

As low as 35 dBA with a 1.5 ton air handling unit;
As low as 59 dBA with a 1.5 ton inverter heat pump.

Easy Control

Wi-fi Control & Dual Control

Easily control the system through simple APP controls or voice commands;
Compatible with two wired controllers for convenient control on different floors.

Ingenious Flexibility

There is a solution for
any climate condition

100%

HEATING OUTPUT

down to -20°C (-4°F)
with COP up to 2.0

-30°C (-22°F)

CONTINUOUS OPERATION
as Cold as -30°C (-22°F)

Extreme Heat Pump

Panasonic Extreme Heat Pumps are able to deliver 100% heating output at -15°C (5°F), ensuring uninterrupted warmth for moderate winters. For areas that experience extreme cold, Panasonic offers a top-notch solution. The Panasonic Extreme condenser unit is capable of delivering 100% or more heating output down to -20°C (-4°F), also offering superior heating performance down to -30°C (-22°F), outdoor temperatures.

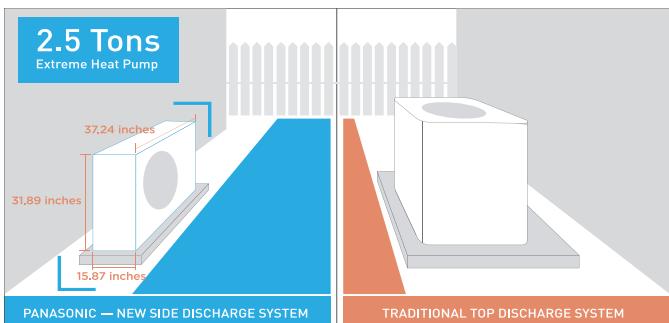

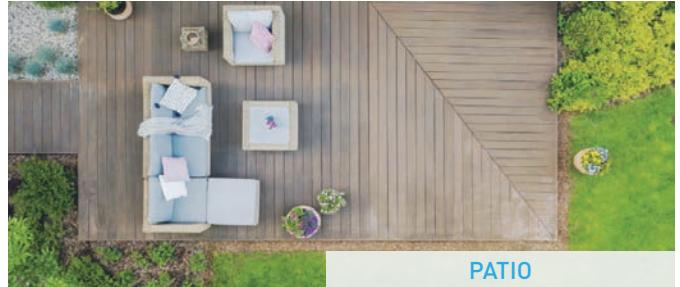

Auxiliary Heat Kit Combinations

Auxiliary heat kits can be added to the heat pump system, so both the fast and intense heat from the electric heater, and the efficient and stable heat generated by the heat pump can be offered. Programmable control enables customized heat pump to electric heat switch over temperatures, that means customers can choose the best heating combination for the climate they live in.

Compact Size Fits Any Space

Thinner design and lighter weight provides unmatched flexibility to fit in any unique home space.

- Fit more in your tech van or truck; 4-5 units as opposed to 1 or 2 traditional.
- Easy to bring to the installation site and install on pad – the single fan unit can be transported by a single worker.

Easy to Install & Maintain

Multi-Position Air Handler

Vertical or horizontal flexible installation.

Slide-Out Fan

Easily take out the fan motor for maintenance.

Magnetic Filler Cover

1 Click to replace the standard filter.

Easy-Access

Just remove 2 screws for access to the electrical board, blower and heater.

Intelligent Diagnostics

Easily accessible error code display.

Hybrid HVAC Solution
