

Product description

New HV590 series is a general current vector control inverter integrated with the performance and features in a high degree.

HV590 with industry-leading drive performance and functionality control, using unique current vector control algorithm can efficiently drive induction motor to achieve high accuracy, high torque and high-performance control.

Customer success, Market Service! HV590 in terms of performance and control are worthy of trust!

Customer benefits

- Suitable for all regions which have different grid and voltage
- Upgrade I/O(NPN/PNP compatible) can meet more application requirement without controller(PLC) like elevator, textile etc.
- Programmable DI/DO/AI/AO as well as RS485 Modbus RTU make easy communication with other devices

Specifcaiton

| Items | Description | |
|----------------|------------------------------------|--|
| Basic function | Control system | High performance of current vector control technology to realize asynchronous motor and synchronous motor control |
| | Drive performance | High efficiency driving for induction motor and synchronous motor |
| | Maximum frequency | Vector control: 0~300HzV/Fcontrol: 0~3200Hz |
| | Carrier frequency | 0.5k~16kHz; the carrier frequency will be automatically adjusted according to the load characteristics |
| | Input frequency resolution | Digital setting: 0.01Hz Analog setting: maximum frequency ×0.025% |
| | Control mode | Open loop vector control(SVC) Closed loop vector control(FVC) V/F control |
| | Startuptorque | Type G: 0.5Hz/150%(SVC); 0Hz/180%(FVC) |
| | Speed range | 1: 100(SVC) Speed range |
| | Speed stabilizing precision | ±0.5%(SVC) Speed stabilizing precision |
| | Torque control precision | ±5%(FVC) |
| | Over load capability | G type: rated current 150% -1 minute, rated current 180% -3 seconds; |
| | Torque boost | Auto torque boost function; Manual torque boost 0.1%~30.0% |
| | V/F curve | Linear V/F,Multi-point V/F and Square V/F curve (power of 1.2, 1.4, 1.6, 1.8, 2) |
| | V/F separation | In 2 ways: separation ,semi seperation |
| | Acc. /deccurve | Straight line or S curve acceleration and deceleration mode. Four kinds of acceleration and deceleration time. Acceleration and deceleration time range between 0.0s to 6500.0s |
| | DC brake | DC brake frequency: 0.00Hz to maximum frequency,brake time: 0.0s to 36.0s, and brake current value: 0.0% to 100.0%. |
| | Jog control | Jog frequency range: 0.00Hz~50.00Hz. Jog acceleration/deceleration time 0.0s~6500.0s. |
| | Simple PLC and MS speed running | It can realize at maximum of 16 segments speed running via the built-in PLC or control terminal. |
| | Built-in PID | It is easy to realize process-controlled close loop control system |
| | Auto voltage regulation (AVR) | It can keep constant output voltage automatically in case of change of network voltage. |
| | Over-voltage/current stall control | It can limit the running voltage/current automatically and prevent frequent over-voltage/current tripping during the running process |
| | Quick current limit | Minimize the over-current fault,protect normal operation of the inverter |

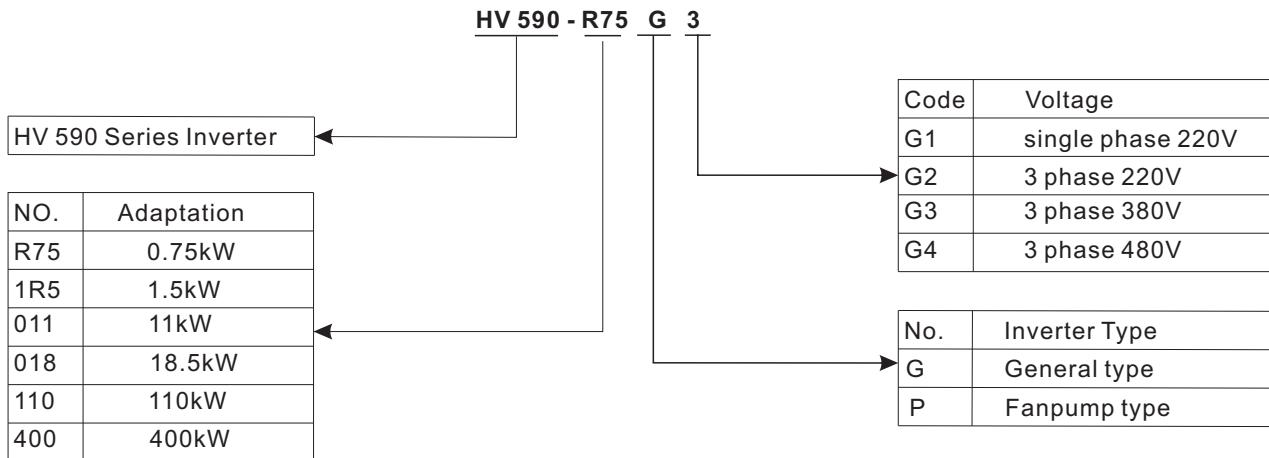

| Items | Description |
|---------------------------------|---|
| T Personalized | Torque limit & control "Excavators" characteristics, automatically limit torque during operation, prevent frequent over-current trip; Closed loop vector mode can realize the torque control. |
| | Instantaneous stop non-stop When instantaneous power off, voltage reduction is compensated through load feedback energy, which could make inverter keep running in a short period of time. |
| | Rapid current limit To avoid inverter frequent over-current fault. |
| | Virtual I/O 5 groups of virtual DI,DO to realize simple logic control |
| | Timing control Timing control function: settimerange 0 Min~6500.0Min |
| | Multiple motor switch 4 groups of motor parameter, which can realize 4-motor switch control |
| | Multi-threaded bus support Support 3 kinds of field bus: RS485, Profibus-DP, CANopen |
| | Motor overheat protection TZ5PC1 analog input AI3x can accept the motor temperature sensor input(PT100、PT1000) |
| | Multi-encoder support Support difference, open collector, UVW, rotary transformer, sine cosine encoder etc. |
| | Programmable PLC Select optional user programmable card, which can realize secondary development, programming mode compatible with Drino PLC. |
| Running | Excellent backend software Support inverter parameter operation and virtual oscilloscope function. Inverter internal state graphic monitor can be realized through virtual oscilloscope. |
| | Running command channel Three types of channels: operation panel reference, control terminal reference and serial communication port reference. These channels can be switched in various modes. |
| | Frequency source There are totally eleven types of frequency sources, such as digital reference, analog voltage reference, analog current reference, pulse reference, MS speed, PLC, PID and serial port reference. |
| | Auxiliary frequency source 11 kinds of auxiliary frequency source which can flexible achieve auxiliary frequency tuning, frequency synthesis |
| | Input terminal Standard: There are 6 digital input terminals, DI5 can be used as 100kHz high-speed pulse input. 2 analog input terminals which can be used as 0-10V voltage input or 0~20mA current input. Extended function: 4 digital input terminals, 1 analog input terminals support -10~10V voltage input & PT100\PT100 |
| | |

| Items | Description |
|--------------------|---|
| | <p>Output terminal</p> <p>Standard: 1 digital output terminals, Y1 is high-speed pulse output terminal (can be chosen as open circuit collector type), support 0~10kHz square wave signal; 2 relay output terminal;</p> <p>2 analog output terminals, support 0~20mA output current or 0~10V output voltage;</p> <p>Extended function: 2 digital output terminal;; 1 analog output terminal, support 0~20mA output current or 0~10V output voltage.</p> |
| Keyboard operation | LED display |
| | Keyboard potentiometer |
| | Key lock&function selection |
| | Protection function |
| | Optional parts |
| Environment | LCD operation panel, brake component, multi-function extended card (1.IO extended card 2.user programmable card), RS485 communication card, Profibus-DP communication card, CANopen communication card, differential input PG card, UVW differential input PG card, rotating inverter PG card, OC input PG card. |
| | Using place |
