

Dimension Editor

Dimension Editor will allow you to modify dimension values in Microsoft Dynamics 365 Business Central

Dimension Editor will allow the user to perform the following functionality not currently available in Business Central:

- View Shortcut Dimension Values directly on the transaction page in all ledgers instead of scrolling to the Dimensions Actions in the ribbon.
 - Edit Global and Shortcut Dimension Values after the entry has been posted to the General Ledger. This is a significant feature since it eliminates the need to post a journal entry to fix coding problems.
 - Track Dimension Value modifications in an Audit Log, showing an audit trail of the user who made the change.
-

The following areas of the system will display the shortcut dimensions directly on the page and provide the ability to edit the dimension values:

- General Ledger Entries
- Item Ledger Entries
- Value Ledger Entries
- Customer Ledger Entries
- Vendor Ledger Entries
- Fixed Asset Ledger Entries
- Bank Account Ledger Entries
- Service Ledger Entries
- Job Ledger Entries
- Warranty Ledger Entries
- Resource Ledger Entries
- Maintenance Ledger Entries
- Phys. Inventory Ledger Entries
- Employee Ledger Entries
- Ins. Coverage Ledger Entries
- Capacity Ledger Entries
- Posted Sales Invoice
- Posted Purchase Invoice
- Posted Service Invoice
