

EXPLORING FOR HIGH-GRADE GOLD IN UNDEREXPLORED FINLAND

Investment Highlights

High-Grade Gold

2024 field program yielded the highest gold anomalies to-date

95.1 g/t Au
Trench rock sample

Drill-Ready

100% owned, royalty-free Ruoppa Gold Project expected to be drilled in summer of 2025

Team

Extensive technical & financial knowledge combined with strong local expertise.

Mining Friendly Northern Finland

Opportunity for new discoveries

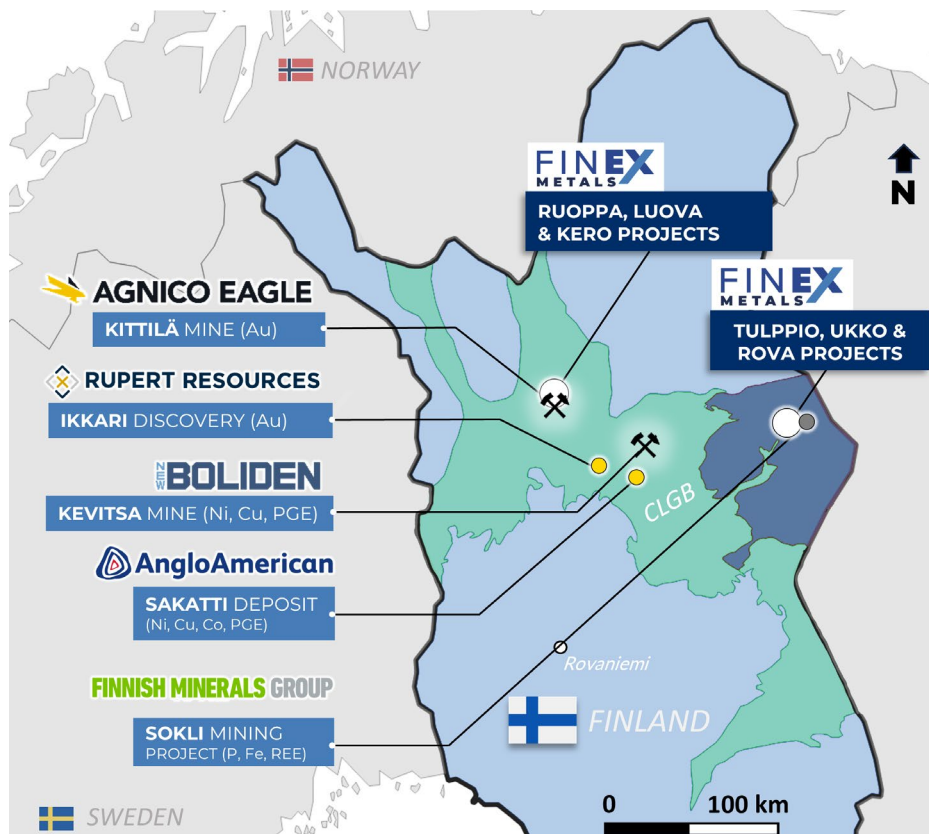

Central Lapland Greenstone Belt (CLGB) is comparable to other major greenstone belts globally, but has significantly fewer deposits discovered due to limited exploration

CLGB hosts largest gold producer in Europe:

Kittilä Mine by Agnico Eagle and recent Ikkari discovery by Rupert Resources¹

Excellent Infrastructure

with easy access to roads, ports, 5G network and renewable energy

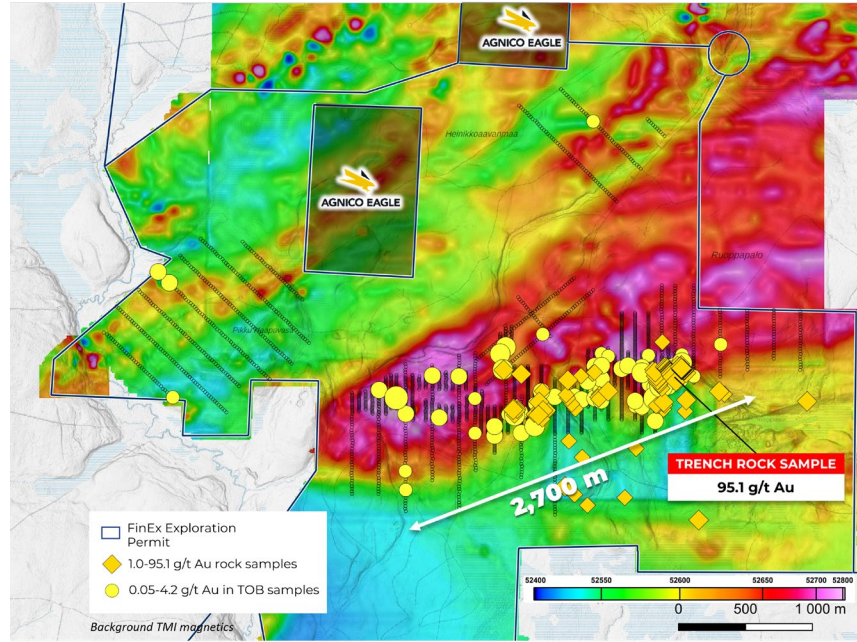

Ruoppa Gold Project

2,700 m long anomalous zone of Au and pathfinder elements

A total of 263 rock grab samples from trenches. **52 returned >1 g/t Au** with the highest at **95.1 g/t Au** within zone extending over 250 metres

70% of Ruoppa remains unexplored

Adjoins Europe's largest gold mine Agnico Eagle's Kittilä Mine¹
