

## WHY FINEX METALS?

- ✓ Exploring for high-grade gold, copper and nickel in Northern Finland.
- ✓ Team has extensive technical & financial knowledge combined with strong local expertise.
- ✓ Countrywide excellent infrastructure with easy access to roads, ports, 5G network and renewable energy.
- ✓ Portfolio of 100% owned, royalty-free projects near existing mining operations.

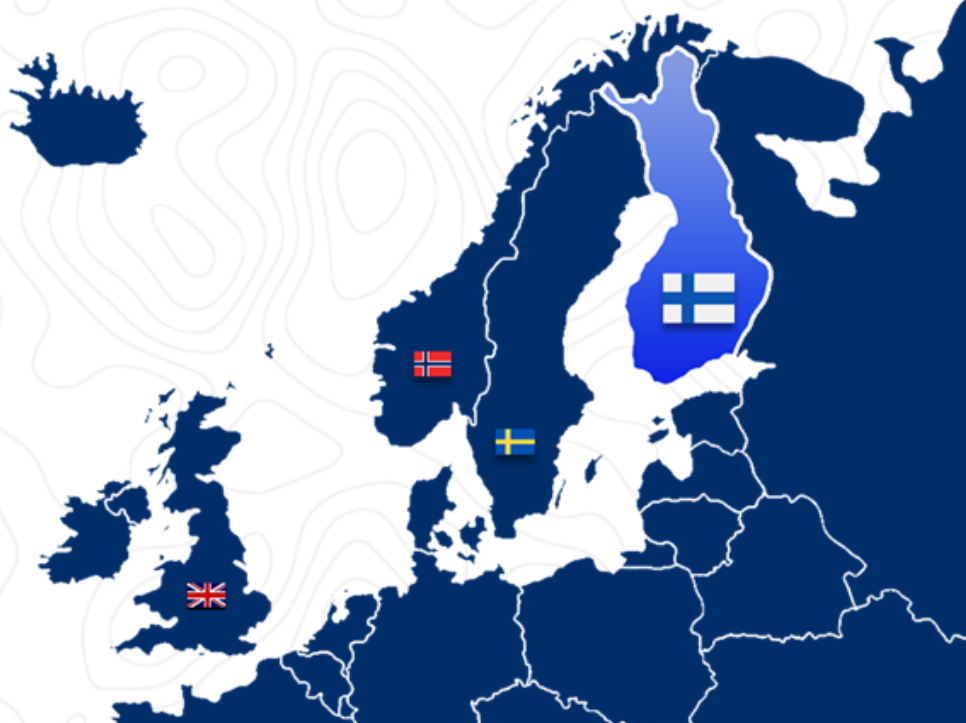

## WHY FINLAND?

Relatively underexplored jurisdiction with substantial opportunities to find new world-class deposits.

Major mining companies operating in the area.

Massive amounts of publicly available exploration data with clear mining laws & regulations.

Low corporate tax rate of 20%.

## MANAGEMENT TEAM

**Tero Kosonen**  
Chairman

MSc - Economics

**Alistair Waddell**  
Director

BSc (Hons.), MAusIMM

**Ernest Mast**  
Director

MSc - Metallurgical Engineering, MBA

**Sandra Wong**  
CFO

CPA, CGA

**Jeffrey R. Wilson**  
Director

**Antti Vuori**  
Director

MSc - Economics

**Dr. Petri Peltonen**  
Chief Geologist

PhD, MAusIMM(CP), EurGeol

**Olli Silvonen**  
Exploration Geologist

BSc - Geology

**Dr. Pasi Eilu**  
Senior Advisor

PhD - Geology

**Eetu Jokela**  
Project Manager

MSc - Geology

**Jukka Jokela**  
Senior Advisor

MSc - Geology

**Phil Smerchanski**  
Senior Advisor

M.Econ.Geol., P.Geo.

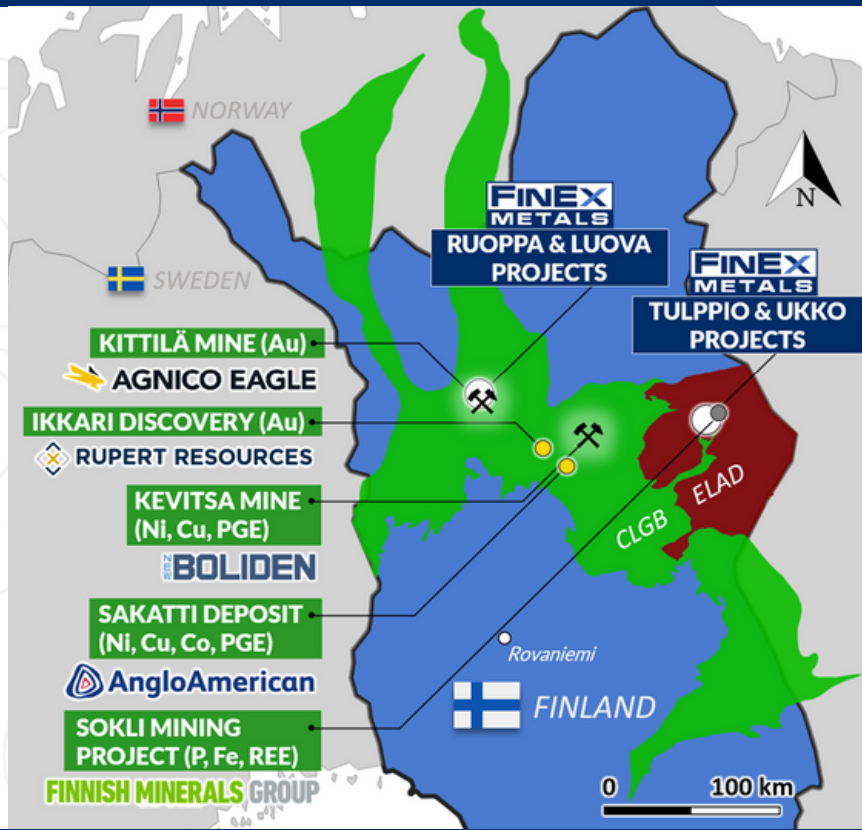

## TECHNICAL TEAM

# WHY EXPLORE NORTHERN FINLAND?

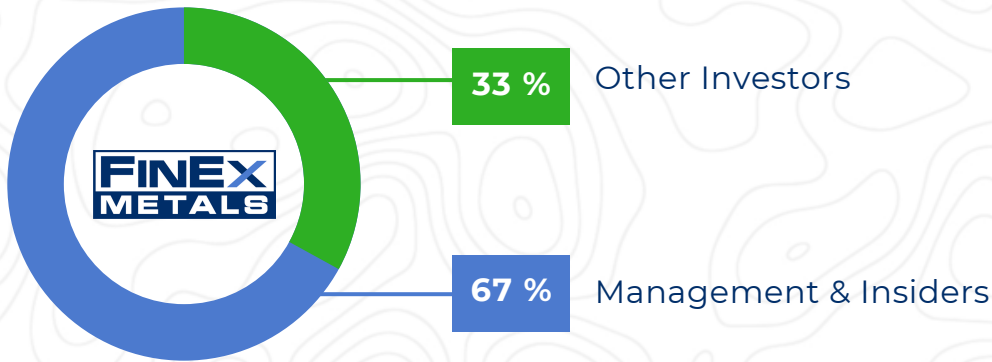

Central Lapland Greenstone Belt (CLGB) is the most mining-friendly region in Finland and geologically comparable to other major greenstone belts globally but has significantly fewer deposits discovered.

CLGB hosts largest primary gold producer in Europe: Kittilä Mine by Agnico Eagle and recent Ikkari discovery by Rupert Resources.

Eastern Lapland Archean Domain (ELAD) is an Archean Greenstone Belt prospective for nickel sulphides and gold with only minor historic exploration.
