Modernizing Air Force Depot Maintenance Operations

Driving Readiness Through Execution and Enterprise Sustainment Intelligence

Client: United States Air Force, Air Force Materiel Command, Air Force Life Cycle Management Center, Program Executive Office for Business and Enterprise Systems, Air Force Sustainment Center, Warner Robins Air Logistics Complex and Oklahoma City Air Logistics Complex

The Challenge

Air Force depot maintenance is critical to sustaining fleet readiness across a globally deployed force. Legacy systems, fragmented data, and manual coordination create delays in planning, scheduling, and execution. Leaders need a secure, scalable solution that improves visibility, supports real-time decisions, and connects teams across multiple locations.

The Solution

Robbins-Gioia delivers a mission-focused, services-led approach supported by enterprise-scale technology. Through the Program Depot Maintenance Scheduling System environment, RG provides hands-on application and operational support for approximately 3,000 users, integrating program management, scheduling intelligence, and system sustainment to keep mission execution moving. Enhancements are delivered through agile development, cybersecurity, testing, and configuration management.

Approach

Execution first. Technology that enables it.

RG embeds with Air Force teams to support mission-critical systems, resolve issues in real time, improve functionality, and train users. A dedicated development and test environment enables continuous improvement and alignment across maintenance, logistics, and technology teams.

The Impact

- ✔ Improves readiness through more reliable scheduling
- ✔ Increases efficiency across depot workflows
- ✔ Enhances decisions with greater performance visibility
- ✔ Reduces risk through cybersecurity and testing
- ✔ Sustains support for 3,000+ users across two Air Logistics Complexes
